16 week sprint triathlon training plan beginner: *80/20 Triathlon* Matt Fitzgerald, David Warden, 2018-09-18 A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In *80/20 Triathlon*, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.

16 week sprint triathlon training plan beginner: IronFit Secrets for Half Iron-Distance

Triathlon Success Don Fink, Melanie Fink, 2013-12-23 Why is the Half Iron-Distance the most popular triathlon distance? Because it is the perfect length for busy athletes with demanding career and family responsibilities. Full Iron-Distance races require such painstaking planning and sacrifice that it's difficult to keep life in balance. The Half Iron-Distance is accessible, while remaining challenging. Also known as the "70.3" for the sum of its 1.2 mile swim, 56 mile bike ride, and 13.1 mile run, the half-iron triathlon is not simply a race for which an athlete can use a full-iron training regimen chopped in half. Doing so would in no way approach maximizing an athlete's performance. The races are performed at completely different intensity levels, with completely different approaches. As a result, the training is completely different. *IronFit Secrets to Half Iron-Distance Triathlon Success* does for the half-iron what *Be IronFit* has done for the full-iron. It provides three sixteen-week training programs—Competitive, Intermediate, and "Just Finish"—and details

everything an athlete needs to know to successfully prepare for and maximize performance at this racing distance. In as little as four months, any athlete can be physically and mentally ready for the world's most popular triathlon challenge.

Hansons Marathon Method offers a radical overhaul of marathon training that promises to turn any runner into a true marathoner and help experienced marathoners set new personal bests. Hansons Marathon Method does away with mega-long runs and high-mileage weekends--two outdated traditions that make most runners miserable. Instead, runners using the Hansons method will gradually build up to the moderate-high mileage required for marathon success, spreading those miles more sensibly throughout the week. Running easy days mixed with precisely paced speed, strength, and tempo workouts, runners will steel their bodies and minds to run the hardest miles of the marathon. Both Beginner and Advanced training programs feature the unique Hansons 16-mile long run which, as part of the Hansons program, is ideal for preparing the body for the marathon. Humphrey explains how runners should set their goal race pace and shows how to customize the Hansons method to their own needs, like adding extra racing, running more miles, and handling training interruptions. Detailed nutrition and hydration chapters help runners pinpoint their personal energy and hydration needs so they know precisely how much to eat and drink during workouts, race week, race day, and for recovery. The Hansons approach to pacing and nutrition means marathoners will never hit the wall. Hansons Marathon Method lays out the smartest marathon training program available from one of the most accomplished running groups in the nation. Using this innovative approach, runners will mold real marathon muscles, train their body to never hit the wall, and prepare to run their fastest marathon.
