16 hour continuing education cosmetology florida: **Ethical Issues in Mental Health** Steve Baldwin, Philip J. Barker, 2013-11-11 Why write another book on ethics? As practitioners we are involved both in the design and delivery of services to people with mental health problems. In common with all other professionals, our work has led to the experience of ethical dilemmas: typically, these have involved major confrontations, either with our colleagues or our consciences. This book, however, is not limited to a discussion of such major themes. Rather, we have tried to use a broader canvas: ethics, in our view, is really about the judgement of right and wrong in ordinary, everyday life. Ethics are highly personal: we fashion our own personal code from our experience of others, and from the 'tests' which bring meaning to our lives. Such experiences shape our individual values. We bring these codes and values to our work. We are not always aware of their influence in our dealings with people. Although we may not always be aware of it, all our actions pose an ethical question. Given that our work involves us in helping others to live ordinary, satisfying lives, this challenge heightens the intensity of our ethical dilemmas. This is most evident where our personal code conflicts with the implicit code of the health setting.

16 hour continuing education cosmetology florida: *The Managed Hand* Miliann Kang, 2010-06-02 Two women, virtual strangers, sit hand-in-hand across a narrow table, both intent on the same thing-achieving the perfect manicure. Encounters like this occur thousands of times across the United States in nail salons increasingly owned and operated by Asian immigrants. This study looks closely for the first time at these intimate encounters, focusing on New York City, where such nail salons have become ubiquitous. Drawing from rich and compelling interviews, Miliann Kang takes us inside the nail industry, asking such questions as: Why have nail salons become so popular? Why do so many Asian women, and Korean women in particular, provide these services? Kang discovers multiple motivations for the manicure--from the pampering of white middle class women to the artistic self-expression of working class African American women to the mass consumption of body-related services. Contrary to notions of beauty service establishments as spaces for building community among women, *The Managed Hand* finds that while tentative and fragile solidarities can emerge across the manicure table, they generally give way to even more powerful divisions of race, class, and immigration.
