1 99 magic guide rs3: Towards Sustainable Society on Ubiquitous Networks Makoto Oya, Ryuya Uda, Chizuko Yasunobu, 2008-09-02 The massive growth of the Internet has made an enormous amount of information available to us. However, it is becoming very difficult for users to acquire an applicable one. Therefore, some techniques such as information filtering have been introduced to address this issue. Recommender systems filter information that is useful to a user from a large amount of information. Many e-commerce sites use recommender systems to filter specific information that users want out of an overload of information [2]. For example, Amazon.com is a good example of the success of recommender systems [1]. Over the past several years, a considerable amount of research has been conducted on recommendation systems. In general, the usefulness of the recommendation is measured based on its accuracy [3]. Although a high recommendation accuracy can indicate a user's favorite items, there is a fault in that only similar items will be recommended. Several studies have reported that users might not be satisfied with a recommendation even though it exhibits high recommendation accuracy [4]. For this reason, we consider that a recommendation having only accuracy is unsatisfactory. The serendipity of a recommendation is an important element when considering a user's long-term profits. A recommendation that brings serendipity to users would solve the problem of "user weariness" and would lead to exploitation of users' tastes. The viewpoint of the diversity of the recommendation as well as its accuracy should be required for future recommender systems.

1 99 magic guide rs3: Alternatives to Privatization David A. McDonald, Greg Ruiters, 2012-04-23 There is a vast literature for and against privatizing public services. Those who are against privatization are often confronted with the objection that they present no alternative. This book takes up that challenge by establishing theoretical models for what does (and does not) constitute an alternative to privatization, and what might make them 'successful', backed up by a comprehensive set of empirical data on public services initiatives in over 40 countries. This is the first such global survey of its kind, providing a rigorous and robust platform for evaluating different alternatives and allowing for comparisons across regions and sectors. The book helps to conceptualize and evaluate what has become an important and widespread movement for better public services in the global South. The contributors explore historical, existing and proposed non-commercialized alternatives for primary health, water/sanitation and electricity. The objectives of the research have been to develop conceptual and methodological frameworks for identifying and analyzing alternatives to privatization, and testing these models against actually existing alternatives on the ground in Asia, Africa and Latin America. Information of this type is urgently required for practitioners and analysts, both of whom are seeking reliable knowledge on what kind of public models work, how transferable they are from one place to another and what their main strengths and weaknesses are.

1 99 magic guide rs3: *Deep Space Telecommunications Systems Engineering* Joseph H. Yuen, 2013-04-17 The challenge of communication in planetary exploration has been unusual. The guidance and control of spacecraft depend on reliable communication. Scientific data returned to earth are irreplaceable, or replaceable only at the cost of another mission. In deep space, communications propagation is good, relative to terrestrial communications, and there is an opportunity to press toward the mathematical limit of microwave communication. Yet the limits must be approached warily, with reliability as well as channel capacity in mind. Further, the effects of small changes in the earth's atmosphere and the interplanetary plasma have small but important effects on propagation time and hence on the measurement of distance. Advances are almost incredible. Communication capability measured in 18 bits per second at a given range rose by a factor of 10 in the 19 years from Explorer I of 1958 to Voyager of 1977. This improvement was attained through ingenious design based on the sort of penetrating analysis set forth in this book by engineers who took part in a highly detailed and amazingly successful program. Careful observation and analysis have told us much about limitations on the accurate measurement of distance. It is not easy to get busy people to tell others clearly and in detail how they have solved important problems. Joseph H. Yuen and the other contributors to this book are to be commended for the time and care they have devoted to explicating one vital aspect of a great adventure of mankind.

1 99 magic guide rs3: Aboriginal Peoples, Colonialism and International Law Irene Watson, 2014-10-17 This work is the first to assess the legality and impact of colonisation from the viewpoint of Aboriginal law, rather than from that of the dominant Western legal tradition. It begins by outlining the Aboriginal legal system as it is embedded in Aboriginal people's complex relationship with their ancestral lands. This is Raw Law: a natural system of obligations and benefits, flowing from an Aboriginal ontology. This book places Raw Law at the centre of an analysis of colonisation – thereby decentring the usual analytical tendency to privilege the dominant structures and concepts of Western law. From the perspective of Aboriginal law, colonisation was a violation of the code of political and social conduct embodied in Raw Law. Its effects were damaging. It forced Aboriginal peoples to violate their own principles of natural responsibility to self, community, country and future existence. But this book is not simply a work of mourning. Most profoundly, it is a celebration of the resilience of Aboriginal ways, and a call for these to be recognised as central in discussions of colonial and postcolonial legality. Written by an experienced legal practitioner, scholar and political activist, *Aboriginal Peoples, Colonialism and International Law: Raw Law* will be of interest to students and researchers of Indigenous Peoples Rights, International Law and Critical Legal Theory.

1 99 magic guide rs3: Nuclear Structure Physics Amritanshu Shukla, Suresh Kumar Patra, 2020-10-21 Nuclear structure Physics connects to some of our fundamental questions about the creation of universe and its basic constituents. At the same time, precise knowledge on the subject has lead to develop many important tools of human kind such as proton therapy, radioactive dating etc. This book contains chapters on some of the crucial and trending research topics in nuclear structure, including the nuclei lying on the extremes of spin, isospin and mass. A better theoretical understanding of these topics is important beyond the confines of the nuclear structure community. Additionally, the book will showcase the applicability and success of the different nuclear effective interaction parameters near the drip line, where hints for level reordering have already been seen, and where one can test the isospin-dependence of the interaction. The book offers comprehensive coverage of the most essential topics, including:

- Nuclear Structure of Nuclei at or Near Drip-Lines
- Synthesis challenges and properties of Superheavy nuclei
- Nuclear Structure and Nuclear models - Ab-initio calculations, cluster models, Shell-model/DSM, RMF, Skyrme
- Shell Closure, Magicity

and other novel features of nuclei at extremes • Structure of Toroidal, Bubble Nuclei, halo and other exotic nuclei These topics are not only very interesting from theoretical nuclear physics perspective but are also quite complimentary for ongoing nuclear physics experimental program worldwide. It is hoped that the book chapters written by experienced and well known researchers/experts will be helpful for the master students, graduate students and researchers and serve as a standard & up-to-date research reference book on the topics covered.
