Contemplating a half marathon? It's a significant undertaking, a testament to your dedication and perseverance. This 10-week half marathon training plan for beginners is designed to guide you safely and effectively towards your goal. While challenging, this plan is structured to build your endurance gradually, minimizing the risk of injury and maximizing your enjoyment of the process. The growing popularity of running events, especially half marathons, has created a significant impact on the fitness industry, boosting participation in related services like coaching, gear sales, and nutrition products. This plan aims to empower you to successfully participate in this burgeoning market and reap the personal rewards.

Understanding the 10 Week Half Marathon Training Plan for Beginners: A Phased Approach

This 10-week half marathon training plan for beginners is divided into three phases:

Phase 1: Building a Base (Weeks 1-3)

This initial phase focuses on establishing a consistent running routine. It emphasizes shorter runs to build your aerobic base and strengthen your muscles. Expect to include cross-training activities like swimming or cycling to enhance overall fitness and prevent overuse injuries.

Week 1-3: Introduce 3 running sessions per week, gradually increasing distance. Include rest days and cross-training sessions. Example: Mon: Rest, Tue: 30 min easy run, Wed: Cross-training, Thu: Rest, Fri: 40 min easy run, Sat: Rest, Sun: 30 min easy run.

Phase 2: Increasing Mileage (Weeks 4-7)

This phase gradually increases your running distance and incorporates longer runs to build endurance. Speed work is introduced to improve your running efficiency. Continue including cross-training and rest days.

Week 4-7: Increase running days to 4 per week. Incorporate one long run per week, gradually increasing the distance. Include interval training sessions (e.g., 400m repeats) once a week. Example: Mon: Rest, Tue: Interval training, Wed: Cross-training, Thu: 45 min easy run, Fri: Rest, Sat: Long run (gradually increasing distance from 6 miles to 8 miles), Sun: 45 min easy run.

Phase 3: Race Preparation (Weeks 8-10)

This final phase focuses on fine-tuning your training for race day. The long runs peak at the target distance, allowing you to simulate race conditions. Reduce the intensity of your speed work and prioritize rest and recovery.

Week 8-10: Maintain 4 running days per week. Reduce speed work significantly. Focus on maintaining long run distance around 8-10 miles. The week before the race should include a significantly shorter run and rest. Example: Mon: Rest, Tue: Easy run (30 mins), Wed: Cross-training, Thu: Easy run (40 mins), Fri: Rest, Sat: 10 miles long run (Week 8, 10 Miles, Week 9, and 8 miles week 10), Sun: Rest.

10 week half marathon training plan for beginners: 80/20 Triathlon Matt Fitzgerald, David Warden, 2018-09-18 A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In 80/20 Triathlon, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.
