**11301 financial centre pkwy little rock ar 72211: Herding Donkeys** Ari Berman, 2010-09-28 After the 2004 election, the Republican Party held the White House, both houses of Congress, twenty-eight governorships, and a majority of state legislatures. One-party rule, it seemed, was here to stay. *Herding Donkeys* tells the improbable tale of the grassroots resurgence that transformed the Democratic Party from a lonely minority to a sizable majority. It chronicles the inside story of Howard Dean's visionary yet deeply controversial fifty-state strategy, charting his unpredictable journey from insurgent presidential candidate, to front-running flameout, to chairman and conscience of the Democratic Party in an unexpected third act. Ari Berman reveals how the Obama campaign built upon Dean's strategy when others ridiculed it, expanding the ranks of the party and ultimately laying the groundwork for Obama's historic electoral victory—but also sowing the seeds of dissent that would lead to legislative stalemate and intraparty strife. Revelatory and entertaining, in the vein of Timothy Crouse's *The Boys on the Bus* and Rick Perlstein's *Nixonland*, *Herding Donkeys* combines fresh reportage with a rich and colorful cast of characters. It captures the untold stories of the people and places that reshaped the electoral map, painting a vivid portrait of a shifting country while dissecting the possibility and peril of a new era in American politics.

In the new edition, chapters have been updated to include discussion of the most recent findings in trauma and neuroscience as well as Joyanna Silberg's popular affect-avoidance model. In addition, Sandra Wieland's incisive commentaries on each case study have been updated. Each chapter presents a detailed narrative of a therapist's work with a child or adolescent interspersed with the therapist's own thought process, and every therapist explains the theory and research behind her clinical decisions. The case studies present many aspects of working with traumatized children—attachment work, trauma processing, work with the family, interactions with the community, psychoeducation related to dissociation, and encouragement of communication between the dissociated parts—and provide a frank analysis of the difficulties clinicians encounter in various therapeutic situations. While the book is exceptional in its clear and detailed descriptions of theory related to dissociation in children, most importantly, it illustrates how theory can be translated into successful therapeutic interactions.
