101 dumbest moments in business: Scaling Up Excellence Robert I. Sutton, Huggy Rao, 2014-02-04 Wall Street Journal Bestseller The pick of 2014's management books. -Andrew Hill, Financial Times One of the top business books of the year. -Harvey Schacter, The Globe and Mail Bestselling author, Robert Sutton and Stanford colleague, Huggy Rao tackle a challenge that determines every organization's success: how to scale up farther, faster, and more effectively as an organization grows. Sutton and Rao have devoted much of the last decade to uncovering what it takes to build and uncover pockets of exemplary performance, to help spread them, and to keep recharging organizations with ever better work practices. Drawing on inside accounts and case studies and academic research from a wealth of industries-- including start-ups, pharmaceuticals, airlines, retail, financial services, high-tech, education, non-profits, government, and healthcare-- Sutton and Rao identify the key scaling challenges that confront every organization. They tackle the difficult trade-offs that organizations must make between whether to encourage individualized approaches tailored to local needs or to replicate the same practices and customs as an organization or program expands. They reveal how the best leaders and teams develop, spread, and instill the right mindsets in their people-- rather than ruining or watering down the very things that have fueled successful growth in the past. They unpack the principles that help to cascade excellence throughout an organization, as well as show how to eliminate destructive beliefs and behaviors that will hold them back. *Scaling Up Excellence* is the first major business book devoted to this universal and vexing challenge and it is destined to become the standard bearer in the field.

101 dumbest moments in business: Crisis in Greece Peter Siani-Davies, 2017-10-15 For nearly five years the international press has been gripped by and reported at great length on the Greek crisis, with news stories gradually filtering out from the deeper recesses of the economic section to the front pages, as the crisis has intensified and mass protests in Athens have caught the world's attention. Meanwhile, what began as a localized fiscal deficit problem grew to be a crisis that challenged the political and social fabric of the nation and at times seemed destined to

undermine the very existence of a global currency, the Euro. This book, written in an accessible and non-technical manner, tells the story of the lengthy crisis that has beset Greece and the wider Eurozone. Is it a purely economic phenomenon or something wider and deeper, as many Greeks would suggest? Are its causes to be found in the prevailing international financial environment or the economic and political system which has evolved in Greece since the early 1970s? Have many of the choices made by both domestic and international actors, such as the IMF and the EU, merely exacerbated the crisis? Most importantly, what has been the impact of the crisis on the daily lives of the country's inhabitants?

101 dumbest moments in business: *Too Scared To Tell, The Dark Side of Telling the Truth* Elwood Corbin, 2021-01-11 *Too Scared To Tell* is a must-read for anyone who has ever wondered -Should I tell? Unfortunately, the irony of telling about a crime or misdemeanor is that those who do so are often treated harshly because speaking up is often viewed as more of a crime than the crime itself. Those who tell become rats, snitches, weasels, and the list goes on. No one is immune; it does not matter whether or not he or she is a member of Congress, the military, law enforcement, a doctor, lawyer, our kids, the butcher, baker, or candlestick maker. Elwood Corbin is an attorney admitted to the New Jersey and Pennsylvania bar. Prior to that, he served a stint in the military, taught high school English and journalism, where his journalism class produced award-winning school newspapers. A history buff, his first novel, *The End of Yesterday*, took a different, somewhat romantic, and mystical look at the Spanish Civil War.

101 dumbest moments in business: *Just Do Something* Kevin DeYoung, 2014-03-21 OVER 300,000 COPIES SOLD! Why won't God reveal his special will for my life already? Because he doesn't intend to... So says Kevin DeYoung in this punchy book about making decisions the godly way. Many of us are listening for the still small voice to tell us what's next instead of listening to the clear voice in Scripture telling us what's now. God does have a will for your life, but it is the same as everyone else's: Seek first the kingdom of God. And quit floundering. With pastoral wisdom and tasteful wit, DeYoung debunks unbiblical ways of understanding God's will and constructs a simple but biblical alternative: live like Christ. He exposes the frustrations of our waiting games and unfolds the freedom of finding God's will in Scripture and then simply doing it. This book is a call to put down our Magic 8-Balls and pick up God's Word. It's a call to get wisdom, follow Christ, be holy, and live freely. To just do something.

101 dumbest moments in business: *Bottled and Sold* Peter H. Gleick, 2010-05-03 Peter Gleick knows water. A world-renowned scientist and freshwater expert, Gleick is a MacArthur Foundation genius, and according to the BBC, an environmental visionary. And he drinks from the tap. Why don't the rest of us? *Bottled and Sold* shows how water went from being a free natural resource to one of the most successful commercial products of the last one hundred years—and why we are poorer for it. It's a big story and water is big business. Every second of every day in the United States, a thousand people buy a plastic bottle of water, and every second of every day a thousand more throw one of those bottles away. That adds up to more than thirty billion bottles a year and tens of billions of dollars of sales. Are there legitimate reasons to buy all those bottles? With a scientist's eye and a natural storyteller's wit, Gleick investigates whether industry claims about the relative safety, convenience, and taste of bottled versus tap hold water. And he exposes the true reasons we've turned to the bottle, from fearmongering by business interests and our own vanity to the breakdown of public systems and global inequities. Designer H2O may be laughable, but the debate over commodifying water is deadly serious. It comes down to society's choices about human rights, the role of government and free markets, the importance of being green, and fundamental values. Gleick gets to the heart of the bottled water craze, exploring what it means for us to bottle and sell our most basic necessity.

101 dumbest moments in business: *Just Do Something* Kevin L. DeYoung, 2009-04-01

Hyper-spiritual approaches to finding God's will don't work. It's time to try something new: Give up. Pastor and author Kevin DeYoung counsels Christians to settle down, make choices, and do the hard work of seeing those choices through. Too often, he writes, God's people tinker around with churches, jobs, and relationships, worrying that they haven't found God's perfect will for their lives. Or-even worse-they do absolutely nothing, stuck in a frustrated state of paralyzed indecision, waiting...waiting...waiting for clear, direct, unmistakable direction. But God doesn't need to tell us what to do at each fork in the road. He's already revealed his plan for our lives: to love him with our whole hearts, to obey His Word, and after that, to do what we like. No need for hocus-pocus. No reason to be directionally challenged. Just do something.

101 dumbest moments in business: *The Depths* Jonathan Rottenberg, 2014-02-11 Nearly every depressed person is assured by doctors, well-meaning friends and family, the media, and ubiquitous advertisements that the underlying problem is a chemical imbalance. Such a simple defect should be fixable, yet despite all of the resources that have been devoted to finding a pharmacological solution, depression remains stubbornly widespread. Why are we losing this fight? In this humane and illuminating challenge to defect models of depression, psychologist Jonathan Rottenberg argues that depression is a particularly severe outgrowth of our natural capacity for emotion. In other words, it is a low mood gone haywire. Drawing on recent developments in the science of mood-and his own harrowing depressive experience as a young adult-Rottenberg explains depression in evolutionary terms, showing how its dark pull arises from adaptations that evolved to help our ancestors ensure their survival. Moods, high and low, evolved to compel us to more efficiently pursue rewards. While this worked for our ancestors, our modern environment-in which daily survival is no longer a sole focus-makes it all too easy for low mood to slide into severe, long-lasting depression. Weaving together experimental and epidemiological research, clinical observations, and the voices of individuals who have struggled with depression, *The Depths* offers a bold new account of why depression endures-and makes a strong case for de-stigmatizing this increasingly common condition. In so doing, Rottenberg offers hope in the form of his own and other patients' recovery, and points the way towards new paths for treatment.

This book's many stories vividly illustrate how corporate strategy must shift to deal effectively with globalization and the new environmental and human rights standards that come with it. *Crisis of Character* offers invaluable advice to anyone who operates in the public sphere—and who understands that reputation is the key to survival.

L. Heath, H. 101 dumbest moments in business: *Cooper's Constant* Robert Cooper, 2018-02-08 Coopers Constant answers fundamental questions about human folly. Why did an Alabama man go to the police station to complain about being cheated in a drug deal? The Peter Principle and the Dilbert Principle attempted to explain incompetence in organizations, and Warren Buffett spoke of the three is of the business cycle the third i standing for the idiots, who screw it all up. Unfortunately, Dr. Peter, Scott Adams, and Warren Buffett failed to ask, Why are so many people the idiots incompetent in the first place? This book furnishes the answer: Coopers Constant. It introduces the reader to the mindless M-type and the M-organization, or MORG. Don't read this book unless you are willing to change your view of humanity.

Based on Jake Breeden's experience coaching thousands of leaders in 27 countries, and the latest scientific research in behavioral economics, neuroscience, and psychology, *Tipping Sacred Cows* reveals how to overcome the dangerous behaviors that masquerade as virtues at work, and how to lead with fewer self-imposed limitations and greater results. Identifies the seven most common sacred cows at work, including balance that turns bland, creativity that conceals narcissism, and passion that becomes obsession Offers simple steps for recognizing and overcoming the potentially career-limiting effects of each of the most common sacred cows Written by Jake Breeden, a faculty member at Duke University's Corporate Education program, rated by Businessweek and The Financial Times as #1 in the world *Tipping Sacred Cows* shines a light on the hidden traps that lie between good intentions and great results, clearing a path so leaders can finally realize their full potential at work. Take this quick 21-question survey to find out which of the seven sacred cows are standing in your way at work.

101 dumbest moments in business: *The Genesis Principle of Leadership* Richard D. Allen, Richard D Allen Ph D, 2008-04 It's time you knew the truth about leadership, and that is exactly what Richard Allen unveils in *The Genesis Principle of Leadership*. Through careful examination of original intent, Richard Allen silences the age-old argument of nature versus nurture. He concludes leaders are not born! Leaders are not made! Leaders are created-in God's image that is. The capacity for great leadership is an inherent, created aptitude within each of us. Not only did God equip us to lead, He also commands us to lead. *The Genesis Principle of Leadership* reminds us of our unique personhood, designed specifically for effective leadership and aids in reclaiming and cultivating this created capacity. Don't be fooled! You do have the right stuff for leadership! You can be the leader God has called you to be!

accomplishing missional purposes. Though the term is ubiquitous in mission circles, there is disparity between its meaning. There has been much theoretical discussion about BAM but far less research accomplished on how it happens out in reality. The Missional Entrepreneur takes an in-depth look at business as missions in action with an eye to expose the most effective principles and practices of this movement.

101 dumbest moments in business: *Planned Obsolescence* Kathleen Fitzpatrick, 2011 Academic institutions are facing a crisis in scholarly publishing at multiple levels: presses are stressed as never before, library budgets are squeezed, faculty are having difficulty publishing their work, and promotion and tenure committees are facing a range of new ways of working without a clear sense of how to understand and evaluate them. *Planned Obsolescence* is both a provocation to think more broadly about the academy's future and an argument for re-conceiving that future in more communally-oriented ways. Facing these issues head-on, Kathleen Fitzpatrick focuses on the technological changes especially greater utilization of internet publication technologies, including digital archives, social networking tools, and multimedia necessary to allow academic publishing to thrive into the future. But she goes further, insisting that the key issues that must be addressed are social and institutional in origin. Confronting a change-averse academy, she insists that before we can successfully change the systems through which we disseminate research, scholars must re-evaluate their ways of working how they research, write, and review while administrators must reconsider the purposes of publishing and the role it plays within the university. Springing from original research as well as Fitzpatrick's own hands-on experiments in new modes of scholarly communication through MediaCommons, the digital scholarly network she co-founded, *Planned Obsolescence* explores all of these aspects of scholarly work, as well as issues surrounding the preservation of digital scholarship and the place of publishing within the structure of the contemporary university. Written in an approachable style designed to bring administrators and scholars into a conversation, *Planned Obsolescence* explores both symptom and cure to ensure that scholarly communication will remain vibrant and relevant in the digital future.
