In the past, the consequences of transportation investments on communities have often been ignored or introduced near the end of a planning process, reducing them to reactive considerations at best. The goals of this primer are to increase awareness of the effects of transportation actions on the human environment and emphasize that community impacts deserve serious attention in project planning and development-attention comparable to that given the natural environment. Finally, this guide is intended to provide some tips for facilitating public involvement in the decision making process.

At its incorporation, the town selected the post office on Main Street as the center of town. The town limits extended only eight-tenths of a mile from its center, but increased rapidly as nearby Fort Bragg was built up. Pearson, 2011-01-15 What happens to orphan diseases that aren't big enough profit centers for the pharmaceutical industry or get caught in the web of government funding and academic research? Augie Nieto found out in the spring of 2005: At forty-seven years old he was diagnosed with ALS. Devastated, Augie struggled with depression and attempted suicide. When he awoke from a coma, with friends and family surrounding him, his sense of faith and mission were renewed. Fast-forward one year: Augie and his wife, Lynne, were profiled as Real Heroes on the Today show. Their determination to beat the disease had already led to major overhauls in the way ALS research was conducted. In partnership with the Muscular Dystrophy Association, Augie had set up a foundation and lab to coordinate and oversee ALS research and testing across the globe. By centralizing operations and championing an entrepreneurial approach to medical research, Augie and his team accomplished remarkable results in less than two years. Part inspiration, part business innovation, Augie's Quest illustrates how one person can make a meaningful difference. Praise for Augie Nieto: George H. W. Bush, former U.S. president: Your contributions to the fitness industry are well known, and your dedication an inspiration. Lance Armstrong, seven-time Le Tour de France champion: I think it says a lot about Augie, the fact that everybody came together regardless of whether or not it's for competing gyms or competing companies that make equipment. They all say, this is one of our own; this is a guy who's committed his life to our industry and has been dealt a serious blow. We're going to be there for him, we're going to say, we're here for you and we're part of the Quest. Arnold Schwarzenegger, governor of California: Your success has been incredible. Greear, Brian Croft, Andrew Davis, 2016-09-06 9Marks Journal: RevitalizeChurch planting is a great thing, and there's no need to take anything away from it. But there should also be a default setting in a Christian's heart that always longs to see dying churches revitalized. It's not like the debate in your head about whether to fork over \$2000 to the mechanic to fix your clunker of a car or to just buy a new one. It's more like a decision about whether to walk away from a dear but difficult relationship. Our hearts should never want to do that, even if once in a great while we must. Start with Andy Davis' remarkable story of reforming one church, and you'll find something that feels strangely like it's from the Bible, as if Andy were only doing what the apostles did. Then let the biblical burden of Bobby Jamieson's article sit on you. I'm serious. You just might find some new light bulbs turning on. Matt Schmucker's and Mike McKinley's articles then round out the apologetic by offering crisp statements for why churches and pastors should pursue the work of revitalizing. If you are a pastor, keep reading into the next section, where Jeramie Rinne, Greg Gilbert, John Folmar, J. D. Greear, and Brian Croft offer valuable and practical wisdom on how to proceed with the work of reform. Could it be that church revitalization does not loom as large in the modern evangelical mindset as it did in Jesus' and the apostles'? Before you answer that question, if nothing else, read Bobby's article. You just might wonder if we've missed something basic.

For example, one idea expressed during the workshop is that computational

thinking is a fundamental analytical skill that everyone can use to help solve problems, design systems, and understand human behavior, making it useful in a number of fields. Supporters of this viewpoint believe that computational thinking is comparable to the linguistic, mathematical and logical reasoning taught to all children. Various efforts have been made to introduce K-12 students to the most basic and essential computational concepts and college curricula have tried to provide a basis for life-long learning of increasingly new and advanced computational concepts and technologies. At both ends of this spectrum, however, most efforts have not focused on fundamental concepts. The book discusses what some of those fundamental concepts might be. Report of a Workshop on the Scope and Nature of Computational Thinking explores the idea that as the use of computational devices is becoming increasingly widespread, computational thinking skills should be promulgated more broadly. The book is an excellent resource for professionals in a wide range of fields including educators and scientists.
