**2024 vw atlas order guide:** A People's Guide to the San Francisco Bay Area Rachel Brahinsky, Alexander Tarr, 2020-10-06 An alternative history and geography of the Bay Area that highlights sites of oppression, resistance, and transformation. A People's Guide to the San Francisco Bay Area looks beyond the mythologized image of San Francisco to the places where collective struggle has built the region. Countering romanticized commercial narratives about the Bay Area, geographers Rachel Brahinsky and Alexander Tarr highlight the cultural and economic landscape of indigenous resistance to colonial rule, radical interracial and cross-class organizing against housing discrimination and police violence, young people demanding economically and ecologically sustainable futures, and the often-unrecognized labor of farmworkers and everyday people. The book asks who had—and who has—the power to shape the geography of one of the most watched regions in the world. As Silicon Valley's wealth dramatically transforms the look and feel of every corner of the region, like bankers' wealth did in the past, what do we need to remember about the people and places that have made the Bay Area, with its rich political legacies? With over 100 sites that you can visit and learn from, this book demonstrates critical ways of reading the landscape itself for clues to these histories. A useful companion for travelers, educators, or longtime residents, this guide links multicultural streets and lush hills to suburban cul-de-sacs and wetlands, stretching from the North Bay to the South Bay, from the East Bay to San Francisco. Original maps help guide readers, and thematic tours offer starting points for creating your own routes through the region.

Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

**2024 vw atlas order guide:** Assembling California John McPhee, 2010-04-01 At various times in a span of fifteen years, John McPhee made geological field surveys in the company of Eldridge Moores, a tectonicist at the University of California at Davis. The result of these trips is *Assembling California*, a cross-section in human and geologic time, from Donner Pass in the Sierra Nevada through the golden foothills of the Mother Lode and across the Great Central Valley to the wine country of the Coast Ranges, the rock of San Francisco, and the San Andreas family of faults. The two disparate time scales occasionally intersect—in the gold disruptions of the nineteenth century no less than in the earthquakes of the twentieth—and always with relevance to a newly understood geologic history in which half a dozen large and separate pieces of country are seen to have drifted in from far and near to coalesce as California. McPhee and Moores also journeyed to remote mountains of Arizona and to Cyprus and northern Greece, where rock of the deep-ocean floor has been transported into continental settings, as it has in California. Global in scope and a delight to read, *Assembling California* is a sweeping narrative of maps in motion, of evolving and dissolving lands.

wonders. Learn how dung beetles navigate by the stars, and trees communicate through their roots. Meet one of the strongest animals in the world: the puny peacock mantis shrimp. Pay your respects to a 44,000 year old shrub, float along flying rivers, and explore a garbage dump overseen by endangered storks. Examine old examples of bird song notation written on sheet music. Also, first person interviews: hear from a honey hunter and his avian partners, a scientist working to find the world's only ocean-dwelling insects, and an offshore radio DJ who is at the heart of the local fishing community. Featuring over 500 extraordinary plants, animals, and natural phenomena, with illustrations and photos on every page, the book takes readers around the globe—from Antarctic deserts to lush jungles, and into the deepest fathoms of the ocean and the hearts of our densest cities. Teeming with detail and wildly entertaining, *Wild Life* reinvigorates our sense of wonder, awe and amazement about the incredible creatures we share our planet with.

**2024 vw atlas order guide: A Farm Family on Long Island's North Fork** Richard A. Wines, 2024-11-01 In *A Farm Family on Long Island's North Fork*, Richard A. Wines traces the history of a vital agricultural community on the North Fork of Long Island through the story of the last family to live in the old Homestead at the Hallockville Museum Farm. For well over two centuries, community members were almost all descendants of the same group of seventeenth-century Puritan founders. Yet, despite their shared heritage and complex interrelationships, cultural wars raged. Family members and the community divided bitterly on issue after issue, ranging from whether to allow a melodeon into the church to supporting abolitionism. The community weathered many changes—the Civil War, the emergence of new agricultural technologies, the arrival of Eastern European immigrants, even an attempt to build a string of nuclear power plants in the twentieth century. Wines's deep dives into one community's history uncover stories about slavery, racism, and prejudice that many have chosen to forget, as well as stories of compassion or human tragedy we want to remember. *A Farm Family on Long Island's North Fork* will appeal to those interested in Long Island regional history and the larger history of rural communities throughout New York and the United States.
