**4234 i 75 business spur: World Development Report 1994** , 1994 World Development Report 1994 examines the link between infrastructure and development and explores ways in which developing countries can improve both the provision and the quality of infrastructure services. In recent decades, developing countries have made substantial investments in infrastructure, achieving dramatic gains for households and producers by expanding their access to services such as safe water, sanitation, electric power, telecommunications, and transport. Even more infrastructure investment and expansion are needed in order to extend the reach of services - especially to people living in rural areas and to the poor. But as this report shows, the quantity of investment cannot be the exclusive focus of policy. Improving the quality of infrastructure service also is vital. Both quantity and quality improvements are essential to modernize and diversify production, help countries compete internationally, and accommodate rapid urbanization. The report identifies the basic cause of poor past performance as inadequate institutional incentives for improving the provision of infrastructure. To promote more efficient and responsive service delivery, incentives need to be changed through commercial management, competition, and user involvement. Several trends are helping to improve the performance of infrastructure. First, innovation in technology and in the regulatory management of markets makes more diversity possible in the supply of services. Second, an evaluation of the role of government is leading to a shift from direct government provision of services to increasing private sector provision and recent experience in many countries with public-private partnerships is highlighting new ways to increase efficiency and expand services. Third, increased concern about social and environmental sustainability has heightened public interest in infrastructure design and performance.

**4234 i 75 business spur: Living Downtown** Paul E. Groth, Paul Erling Groth, Paul Groth, 1994-01-01 From the palace hotels of the elite to cheap lodging houses, residential hotels have been an element of American urban life for nearly two hundred years. Since 1870, however, they have been the target of an official war led by people whose concept of home does not include the hotel. Do these residences constitute an essential housing resource, or are they, as charged, a public nuisance? *Living Downtown*, the first comprehensive social and cultural history of life in American residential hotels, adds a much-needed historical perspective to this ongoing debate. Creatively combining evidence from biographies, buildings and urban neighborhoods, workplace records, and housing policies, Paul Groth provides a definitive analysis of life in four price-differentiated types of downtown residence. He demonstrates that these hotels have played a valuable socioeconomic role as home to both long-term residents and temporary laborers. Also, the convenience of hotels has made them the residence of choice for a surprising number of Americans, from hobo author Boxcar Bertha to Calvin Coolidge. Groth examines the social and cultural objections to hotel households and the increasing efforts to eliminate them, which have led to the seemingly irrational destruction of millions of such housing units since 1960. He argues convincingly that these efforts have been a leading contributor to urban homelessness. This highly original and timely work aims to expand the concept of the American home and to recast accepted notions about the relationships among urban life, architecture, and the public management of residential environments.

The authors conclude with discussions of rural versus urban homelessness, street children in Latin America, and homelessness in postindustrial societies.

Award-winning historian Leon Metz takes the reader from America's early westward expansion to today's awesome border problems of water rights, pollution, immigration, illegal aliens, and the massive effort of two nations attempting to pull together for a common cause.

**4234 i 75 business spur: Jump-Starting America** Jonathan Gruber, Simon Johnson, 2019-04-09 The untold story of how America once created the most successful economy the world has ever seen—and how we can do it again. The American economy glitters on the outside, but the reality is

quite different. Job opportunities and economic growth are increasingly concentrated in a few crowded coastal enclaves. Corporations and investors are disproportionately developing technologies that benefit the wealthiest Americans in the most prosperous areas -- and destroying middle class jobs elsewhere. To turn this tide, we must look to a brilliant and all-but-forgotten American success story and embark on a plan that will create the industries of the future -- and the jobs that go with them. Beginning in 1940, massive public investment generated breakthroughs in science and technology that first helped win WWII and then created the most successful economy the world has ever seen. Private enterprise then built on these breakthroughs to create new industries -- such as radar, jet engines, digital computers, mobile telecommunications, life-saving medicines, and the internet-- that became the catalyst for broader economic growth that generated millions of good jobs. We lifted almost all boats, not just the yachts. Jonathan Gruber and Simon Johnson tell the story of this first American growth engine and provide the blueprint for a second. It's a visionary, pragmatic, sure-to-be controversial plan that will lead to job growth and a new American economy in places now left behind.

We also find that countries that implemented product-market reforms had a more pronounced increase in competition, and correspondingly, in productivity: the contribution to productivity growth due to competition spurred by product-market reforms is around 12-15 percent.

**4234 i 75 business spur: Toward Fundamental Tax Reform** Kevin A. Hassett, Alan J. Auerbach, 2005 Tax experts across the political spectrum agree that the current rate structure is not rational and that potential gains from reform could be remarkable. Accordingly, tax reform is widely viewed as desirable. However, there is not a clear consensus on what reforms are most desirable or feasible. In *Toward Fundamental Tax Reform*, eleven leading tax scholars, including a Nobel Prize winner, outline their ideas about tax reform. The original essays provide readers with concise but varying perspectives on the possibilities of tax reform. They also focus attention on key questions in

the scholarly debate: Would a different tax code dramatically alter the functioning of the economy? How much damage does the current law do? Can relatively small changes to the tax code deliver most of the benefits of more dramatic reforms like the flat tax? Are political forces that oppose efficient tax systems simply too powerful to overcome? Will tax reform inevitably harm the poor? Can a tax reform, if enacted, be sustained?

**4234 i 75 business spur: Funding Democratization** Peter J. Burnell, Allan Ware, 2006-12-15 Democracy is a fine political system, but an expensive economic venture. Political parties and election campaigns cost money. Where does the money come from and at what sacrifice? Issues connected with political finance are significant but often neglected aspects of the process of democratization. *Funding Democratization* examines how money and politics interact in emerging democracies. The contributors investigate the funding of political parties in early North America, financial uncertainties of party formation in European countries, funding of democratization in new democracies, and the influence of funding on contenders for power. They also address the nature of political competition in countries that are seeking to embrace, often for the first time, the rules of democracy. They question in what ways politicians can help make democracy affordable. The volume compares important democratizing countries, such as Russia, Brazil, South Africa, Spain, and the regions of East Asia and East/Central Europe. It also investigates the lessons that emerging democracies can learn from the history of political finance in today's more established democracies. *Funding Democratization* will be of interest to political scientists and specialists in international social and political development. Peter Burnell studied economics and politics at the University of Bristol before going on to complete his graduate studies with a dissertation on *The Political and Social Thought of Thomas Paine, 1737-1809*, both at the University of Warwick. He is the founding joint editor of the journal *Democratization* and the accompanying book series *Democratization Studies*. **4234 i 75 business spur: Vietnam 2035** World Bank Group;Ministry of Planning and Investment of Vietnam, 2016-11-07 Thirty years of *Đổi Mới* (economic renovation) reforms have catapulted Vietnam from the ranks of the world's poorest countries to one of its great development success stories. Critical ingredients have been visionary leaders, a sense of shared societal purpose, and a focus on the future. Starting in the late 1980s, these elements were successfully fused with the embrace of markets and the global economy. Economic growth since then has been rapid, stable, and inclusive, translating into strong welfare gains for the vast majority of the population. But three decades of success from reforms raises expectations for the future, as aptly captured in the Vietnamese constitution, which sets the goal of "a prosperous people and a strong, democratic, equitable, and civilized country." There is a firm aspiration that by 2035, Vietnam will be a modern and industrialized nation moving toward becoming a prosperous, creative, equitable, and democratic society. The Vietnam 2035 report, a joint undertaking of the Government of Vietnam and the World Bank Group, seeks to better comprehend the challenges and opportunities that lie ahead. It shows that the country's aspirations and the supporting policy and institutional agenda stand on three pillars: balancing economic prosperity with environmental sustainability; promoting equity and social inclusion to develop a harmonious middle- class society; and enhancing the capacity and accountability of the state to establish a rule of law state and a democratic society. Vietnam 2035 further argues that the rapid growth needed to achieve the bold aspirations will be sustained only if it stands on faster productivity growth and reflects the costs of environmental degradation. Productivity growth, in turn, will benefit from measures to enhance the competitiveness of domestic enterprises, scale up the benefits of urban agglomeration, and build national technological and innovative capacity. Maintaining the record on equity and social inclusion will require lifting marginalized groups and delivering services to an aging and urbanizing middle-class society. And to fulfill the country's aspirations, the institutions of governance will need to become modern, transparent, and fully rooted in the rule of law.
