8 week half marathon training plan for beginners: *80/20 Triathlon* Matt Fitzgerald, David Warden, 2018-09-18 A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In *80/20 Triathlon*, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance--Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.

Vietnam war. Inspired by the author's experience as a collegiate champion, the novel follows Quenton Cassidy, a competitive runner at fictional Southeastern University whose lifelong dream is to run a four-minute mile. He is less than a second away when the turmoil of the Vietnam War era intrudes into the staid recesses of his school's athletic department. After he becomes involved in an athletes' protest, Cassidy is suspended from his track team. Under the tutelage of his friend and mentor, Bruce Denton, a graduate student and former Olympic gold medalist, Cassidy gives up his scholarship, his girlfriend, and possibly his future to withdraw to a monastic retreat in the countryside and begin training for the race of his life against the greatest miler in history. A rare insider's account of the incredibly intense lives of elite distance runners, *Once a Runner* is an inspiring, funny, and spot-on tale of one individual's quest to become a champion.

But as with many other barriers women have faced over time, we fought our way in. Today, women make up almost half of the marathoning population. Yet most marathon training manuals are written by men. And while these men are experts when it comes to how men can and should train, women need training programs tailored to our bodies—to our unique strengths and weaknesses—so that we can avoid injuries and run at our peak. The programming in this book was created by a woman, specifically for women. Master the Marathon is a comprehensive guide to marathon training for women at all levels of running—beginner, intermediate, and advanced. The book takes you through everything you need to know to be prepared for the 26.2 miles of the marathon, including detailed training plans, strength training programs, building your mental awareness of your physical body, nutrition, guidance on finding the best marathon for you, identifying and avoiding potential injuries, inspirational advice, and other unexpected pieces of wisdom.
