abcya find the technology: Assessing Student's Digital Writing Troy Hicks, 2015 In this book, Troy Hicks—a leader in the teaching of digital writing—collaborates with seven National Writing Project teacher consultants to provide a protocol for assessing students' digital writing. This collection highlights six case studies centered on evidence the authors have uncovered through teacher inquiry and structured conversations about students' digital writing. Beginning with a digital writing sample, each teacher offers an analysis of a student's work and a reflection on how collaborative assessment affected his or her teaching. Because the authors include teachers from kindergarten to college, this book provides opportunities for vertical discussions of digital writing development, as well as grade-level conversations about high-quality digital writing. The collection also includes an introduction and conclusion, written by Hicks, that provides context for the inquiry group's work and recommendations for assessment of digital writing. Book Features: An adaptation of the Collaborative Assessment Conference protocol to help professional learning communities examine students' digital work. Detailed descriptions of students' digital writing, including the assessment process and implications for instruction. Links to the samples of student digital writing available online for further review and to be used as digital mentor texts. "Building on his foundational work in helping us to embrace digital writing in the classroom, Hicks and his collaborators help us take the next step to becoming teachers who practice authentic assessment that supports students to learn through digital writing. This is the book (and the thinking) that advances our field." —Sara Kajder, Clinical Assistant Professor, Department of Language and Literacy Education, University of Georgia

abcya find the technology: Handbook of CLIL in Pre-primary Education Ana Otto, Beatriz Cortina-Pérez, 2023-05-16 This book provides an in-depth look on Content and Language Integrated Learning (CLIL) and Early Childhood Education (ECE), two domains where major joint research is needed. abcya find the technology: The Anti-Education Era James Paul Gee, 2013-01-08 One of the first champions of the positive effects of gaming reveals the dark side of today's digital and social media Today's schools are eager to use the latest technology in the classroom, but rather than improving learning, the new e-media can just as easily narrow students' horizons. Education innovator James Paul Gee first documented the educational benefits of gaming a decade ago in his classic What Video Games Have to Teach Us About Learning and Literacy. Now, with digital and social media at the center of modern life, he issues an important warning that groundbreaking new technologies, far from revolutionizing schooling, can stymie the next generation's ability to resolve deep global challenges. The solution-and perhaps our children's future-lies in what Gee calls synchronized intelligence, a way of organizing people and their digital tools to solve problems, produce knowledge, and allow people to count and contribute. Gee explores important strategies and tools for today's parents, educators, and policy makers, including virtual worlds, artificial tutors, and ways to create collective intelligence where everyday people can solve hard problems. By harnessing the power of human creativity with interactional and technological sophistication we can finally overcome the limitations of today's failing educational system and solve problems in our high-risk global world. The Anti-Education Era is a powerful and important call to reshape digital learning, engage children in a meaningful educational experience, and bridge inequality.
