**accounting finance double major:** Double Accounting for Goodwill Martin Bloom, 2013-05-13  
Goodwill, sometimes purchased but often more significantly internally generated, is the major constituent of the value of many listed companies. Accounting aims to provide users of financial statements with useful information, and more than fifty current International Financial Reporting Standards prescribe accounting disclosure requirements in minute detail. However, these Standards dismiss internally generated goodwill with a single brief provision that it is not to be brought to account at all. The impairment regime now laid down for dealing with purchased goodwill contains severe flaws, while previous methods have also been found to be unsatisfactory. This book traces the history of the goodwill accounting controversy in detail and demonstrates that it has been a prime example of an issue 'conceived in a way that it is in principle unsolvable'. It explores the problem of recognising the importance of goodwill as a whole and finding a way of presenting meaningful information regarding it in the context of the financial statements. The author's proposed solution builds upon research undertaken and uses a Market Capitalization Statement, based on a modification of nineteenth century 'double accounting' in a modern context. Examples show that the

proposed Market Capitalization Statement has the potential to provide significant information not currently available from conventional financial statements, which in turn are freed to present clearer information.

**accounting finance double major: The Big Four** Ian D. Gow, Stuart Kells, 2018-08-28 Messrs. Gow and Kells have made an invaluable contribution, writing in an amused tone that nevertheless acknowledges the firms' immense power and the seriousness of their neglect of traditional responsibilities. 'The Big Four' will appeal to all those interested in the future of the profession—and of capitalism itself. —Jane Gleeson-White, Wall Street Journal With staffs that are collectively larger than the Russian army and combined revenues of over \$130 billion a year, the Big Four accounting firms—Deloitte, PricewaterhouseCoopers, Ernst & Young, and KPMG—are a keystone of global commerce. But leading scholar Ian Gow and award-winning author Stuart Kells warn that a house of cards may be about to fall. Stretching back to the Medicis in Renaissance Florence, this book is a fascinating story of wealth, power, and luck. The founders of the Big Four lived surprisingly colorful lives. Samuel Price, for example, married his own niece. Between the world wars, Nicholas Waterhouse collected postage stamps while also hosting decadent parties in his fashionable London home. All four firms have endured major calamities in recent decades. There have been hundreds of court cases and legal prosecutions for failed audits, tax scandals, and breaches of independence. The firms have come so close to “extinction level events” that regulators have required them to prepare “living wills.” And today, the Big Four face an uncertain future—thanks to their push into China, their vulnerability to digital disruption and competition, and the hazards of providing traditional services in a new era of transparency. This account of the past, present, and likely future of the Big Four is essential reading for anyone perplexed or fascinated by professional services, working or considering working in the industry, or simply curious about the fate of the global economy.

**accounting finance double major: *The Corporation*** Joel Bakan, 2019-09-03 The inspiration for the film that won the 2004 Sundance Film Festival Audience Award for Best Documentary, *The Corporation* contends that the corporation is created by law to function much like a psychopathic personality, whose destructive behavior, if unchecked, leads to scandal and ruin. Over the last 150 years the corporation has risen from relative obscurity to become the world's dominant economic institution. Eminent Canadian law professor and legal theorist Joel Bakan contends that today's corporation is a pathological institution, a dangerous possessor of the great power it wields over people and societies. In this revolutionary assessment of the history, character, and globalization of the modern business corporation, Bakan backs his premise with the following observations: -The corporation's legally defined mandate is to pursue relentlessly and without exception its own economic self-interest, regardless of the harmful consequences it might cause to others. -The corporation's unbridled self-interest victimizes individuals, society, and, when it goes awry, even shareholders and can cause corporations to self-destruct, as recent Wall Street scandals reveal. -Governments have freed the corporation, despite its flawed character, from legal constraints through deregulation and granted it ever greater authority over society through privatization. But Bakan believes change is possible and he outlines a far-reaching program of achievable reforms through legal regulation and democratic control. Featuring in-depth interviews with such wide-ranging figures as Nobel Prize winner Milton Friedman, business guru Peter Drucker, and cultural critic Noam Chomsky, *The Corporation* is an extraordinary work that will educate and enlighten students, CEOs, whistle-blowers, power brokers, pawns, pundits, and politicians alike.

In this accessible but provocative guide to the economics of land and housing, the authors reveal how many of the key challenges facing modern economies - including housing crises, financial instability and growing inequalities - are intimately tied to the land economy. Looking at the ways in which discussions of land have been routinely excluded from both housing policy and economic theory, the authors show that in order to tackle these increasingly pressing issues a major rethink by both politicians and economists is required.

**accounting finance double major: Kennedy and Roosevelt** Michael Beschloss, 2016-08-16

The revealing story of Franklin Roosevelt, Joe Kennedy, and a political alliance that changed history, from a New York Times–bestselling author. When Franklin Roosevelt ran for president in 1932, he gained the support of Joseph Kennedy, a little-known businessman with Wall Street connections. Instrumental in Roosevelt’s victory, their partnership began a longstanding alliance between two of America’s most ambitious power brokers. Kennedy worked closely with FDR as the first chairman of the Securities and Exchange Commission, and later as ambassador to Great Britain. But at the outbreak of World War II, sensing a threat to his family and fortune, Kennedy lobbied against American intervention—putting him in direct conflict with Roosevelt’s intentions. Though he retreated from the spotlight to focus on the political careers of his sons, Kennedy’s relationship with Roosevelt would eventually come full circle in 1960, when Franklin Roosevelt Jr. campaigned for John F. Kennedy’s presidential win. With unprecedented access to Kennedy’s private diaries as well as firsthand interviews with Roosevelt’s family and White House aides, New York Times–bestselling author Michael Beschloss—called “the nation’s leading presidential historian” by Newsweek—presents an insightful study in contrasts. Roosevelt, the scion of a political dynasty, had a genius for the machinery of government; Kennedy, who built his own fortune, was a political outsider determined to build a dynasty of his own. From the author of *The Conquerors* and *Presidential Courage*, this is a “fascinating account of the complex, ambiguous relationship of two shrewd, ruthless, power-hungry men” (The New York Times Book Review).

**accounting finance double major: Career as an Accountant** Institute for Career Research, 2014-06 Accounting is one of the most in-demand careers today, with more new jobs opening up every day. The opportunities available to accountants, auditors and similar professionals in the field are expected to continue expanding as international business increases and more government regulations take effect. Accounting is rated among the top five careers by such publications as Forbes and CNN/Money, with new graduates earning an average of \$55,000 in their first year on the job. Accountants work with businesses, governments and other organizations to analyze and manage their finances. Accountants use spreadsheets and other computer applications to record, communicate and interpret financial results. They track transactions, recommend cost-cutting measures, and ensure that taxes are paid promptly and correctly. Accountants also help individuals and families file their taxes and manage their personal finances. Opportunities for accountants can be found in cities of all sizes across the country. Some accountants are employed directly by businesses, government agencies, not-for-profits, colleges and similar organizations. Others work for public accounting firms that are retained by organizations to provide financial services. Accountants may also be self-employed, such as those who specialize in providing tax services for families. A four-year degree from an accredited college or university is typically the minimum requirement to land your first job as an accountant. A graduate degree can be helpful, particularly for management positions or highly technical financial analysis work. Many accountants obtain professional licenses, most notable the Certified Public Accountant (CPA). State licensing requirements vary, but CPAs generally must obtain additional college credit hours, have experience working in the field, and pass a rigorous examination. Employment experts predict that the number of accounting and auditing jobs will grow by over 15 percent within the coming decade, as economic expansion drives the need for financial expertise. Accountants and auditors are paid on average \$65,000 a year, a significant increase from just \$60,000 only a few years ago, and earnings are expected to continue to track upward.
