**accounting firms hong kong: Hong Kong Mobile** Helen F. SIU, Agnes S. KU, 2009-02-01 In this interdisciplinary study, the authors argue that Hong Kong should strengthen the mobility of its population. One country, two systems is a concept not uniquely reserved for post-1997 Hong Kong. Historically, the territory has thrived on being simultaneously part of China and the world. Flexible positioning at the margins has made it a node in the crossroads of empires, trading communities, industrial assembly lines, and now global finance, consumption and media. This essential characteristic, Hong Kong as a 'space of flow,' has always been the source of its success. The book shows that a porous border in fact has been maintained in the post-war years. Unique institutions developed over the century have absorbed waves of immigrants entering from China. However, the study warns that the population is now aging when compared with other world cities and China's fast growing urban centers. Only with a massive input of young, educated, and diverse human

talents can Hong Kong remain a vibrant portal for the creative fusion of capital, goods, services, cultural horizons, aspirations and civic energies.

### **accounting firms hong kong: People's Republic of China-Hong Kong Special**

**Administrative Region** International Monetary Fund. Monetary and Capital Markets Department, 2014-07-16 This Financial Sector Assessment Program report on People's Republic of China-Hong Kong Special Administrative Region highlights that it has developed a sound framework for the regulation of securities markets, which exhibits a high level of implementation of the International Organization of Securities Commissions Principles. Both the Securities and Futures Commission (SFC) and the Hong Kong Monetary Authority (HKMA) are sophisticated regulators and have been able to leverage from domestic and international expertise to develop sound supervisory practices. Further, while traumatic, the Lehman minibond experience has led to material improvements in conduct supervision that have permeated both the SFC and the HKMA. Continuing efforts by the SFC to build up its capacity to identify and monitor emerging risks should increase the SFC's ability to react in a timely manner to an evolving landscape, marked by an increased interconnection with the Mainland China, an active presence by international players and increased regional competition as an international finance center. It is important to consider translating the operational independence that the regulators have enjoyed into de-jure independence, through modifications in the current legal governance arrangements for both SFC and HKMA.

**accounting firms hong kong: China's Financial System** Dominique De Rambures, Felipe Escobar Duenas, 2017-02-27 This book examines the volatile landscape of the Chinese economy and the barriers to its continuing development. The author argues that underlying inefficiencies in China's financial system currently prevent the further growth of its institutions and inhibit reform of monetary and fiscal policy. Rambures shows that, despite efforts to avoid a "middle income trap", such long-overdue structural reforms are still faced with strong resistance from both economic and political circles. Chapters discuss approaches in tackling the Chinese national debt, the recent stock exchange collapse and subsequent currency devaluation, declining trade surplus, the wariness of foreign investors and its negative impact on foreign exchange reserves, and the heavy burden of state-owned "zombie companies". The discussion positions current economic events within the context of China's transition from a foreign trade and investment-led economy to one that is propelled by domestic consumption, service industries and innovation. Crucially, Rambures also addresses financial trends with reference to pervasive long-term influencing factors such as an ageing population, increasing inequality, corruption, pollution and migration.

**accounting firms hong kong:** The Handbook of China's Financial System Marlene Amstad, Guofeng Sun, Wei Xiong, Darrell Duffie, 2020-11-17 The Chinese economy is now easily one of the most important and closely scrutinized economies in the world. Relatively minuscule changes in predictions of how the Chinese economy will perform can drive up or down stocks and the price of oil and other commodities. At the heart of how the Chinese economy works is its financial system-but the Chinese financial system is vastly different than most people in the West can understand. How do house prices work, for example, in a country where the very concept of property ownership is significantly different than our own? This edited volume will serve as a standard reference guide to China's financial system. With eighteen chapters, the handbook features overviews on the banking sector-the core of China's financial system and the key channel for implementing China's monetary policy-China's ongoing reforms, and the quickly growing bond and money markets, among other topics. Each chapter is written by a leading expert in the field, and as a whole the list of contributors represents an impressive mix of leading scholars and high-level policy officials, some with first-hand knowledge of setting and carrying out Chinese financial policy. The handbook will serve as the first real authoritative volume of literature in the field, and will shed extensive new light on the links between China's financial system and the real economy--

well as its obstacles and options. The report argues that China can meet these challenges and sustain rapid growth, mainly because of its strengths including its relative stability, a remarkably high savings rate, a strong record of pragmatic reforms, a disciplined and literate labor force, a supportive Chinese diaspora, and growing administrative capacity. These strengths have driven the country's growth for the past two decades and can continue to do so over the next two. To nurture these strengths and use them effectively, however, reforms must develop in three related areas: the spread of market forces must be encouraged; the government must begin serving markets by building the legal, social, physical, and institutional infrastructure, and integration with the world economy must be deepened.
