**acc submit your science: Cardiovascular Prevention and Rehabilitation** Joep Perk, Peter Mathes, Helmut Gohlke, Irene Hellemans, Catherine Monpère, Hannah McGee, Philippe Sellier, Hugo Saner, 2007-09-18 In the network of cardiologists within the European Society of Cardiology Working Group on Cardiac Rehabilitation and Exercise Physiology there is a strong view that the time indeed is right to publish definitively on the methods involved in cardiovascular prevention and rehabilitation. We are facing a transition from conventional cardiac rehabilitation to a phase of combined preventive and rehabilitative efforts, as witnessed in the recent Joint Task Force Guidelines on Preventive Cardiology. For this revision of our clinical routines we lack a practical textbook, based upon the conditions and resources of European health care. This textbook is designed to fill that gap.

**acc submit your science: McDonald's Blood Flow in Arteries 5Ed** Wilmer W. Nichols, Michael F. O'Rourke, 2005-02-25 This classic text, first published in 1960 and introducing at that time an

entirely new approach to the study of arterial haemodynamics, provides a theoretical basis to understanding blood flow in normal and disease conditions. It examines the relationship between pulsatile pressure and flow in the arteries using a mathematical model of fluid flow principles. The current authors have developed the ground-breaking work of Donald McDonald through three editions during a period in which arterial disease has exploded as a huge clinical problem in the developed and developing world, and the content now reflects the application of the original haemodynamic discoveries to everyday clinical practice. The new edition retains the features key to the popularity of the earlier volumes - a strong scientific base, a focus on practical applications, a comprehensive coordinated style and a lack of fear in challenging established authority - but brings the content entirely up to date.

Sagristà-Sauleda, 2012-12-06 In November 1986, I was invited to attend a symposium held in Barcelona on Diseases of the Pericardium. The course was directed by Dr. J. Soler-Soler, director of Cardiology at Hospital General Vall d'Hebron in Barcelona. During my brief but delightful visit to this institution, my appreciation of the depth and breadth of study into pericardial diseases, carried out by Dr. Soler and his group, grew into the conviction that these clinical investigators have accumulated a wealth of information concerning pericardial diseases, and that investigators and clinicians practicing in English speaking countries would greatly profit from ready access to the results of the clinical investigations into pericardial disease carried out in Barcelona. The proceedings of the Barcelona conference were published in a beautifully executed volume in the Spanish language edited by Dr. Soler and produced by Ediciones Doyma. Because I believe that this work should be brought to the attention of the English speaking scientific and clinical communities, I encouraged Dr. Soler to have the book translated into English. I knew that this task could be accomplished and that the book would be translated into good English without change of its content. My confidence was based upon a translation of my own book, *The Pericardium*, into Spanish undertaken by Dr. Permanyer, who is a contributor and co-editor of the present volume.

**acc submit your science: The ESC Textbook of Intensive and Acute Cardiovascular Care** Marco Tubaro, Pascal Vranckx, Susanna Price, Christiaan Vrints, Eric Bonnefoy, 2021-03-08 The *ESC Textbook of Intensive and Acute Cardiovascular Care* is the official textbook of the Acute Cardiovascular Care Association (ACVC) of the ESC. Cardiovascular diseases (CVDs) are a major cause of premature death worldwide and a cause of loss of disability-adjusted life years. For most types of CVD early diagnosis and intervention are independent drivers of patient outcome. Clinicians must be properly trained and centres appropriately equipped in order to deal with these critically ill cardiac patients. This new updated edition of the textbook continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care and addresses all those involved in intensive and acute cardiac care, not only cardiologists but also critical care specialists, emergency physicians and healthcare professionals. The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment as well as organisational issues,

cooperation among professionals, and interaction with other specialities in medicine. SECTION 1 focusses on the definition, structure, organisation and function of ICCU's, ethical issues and quality of care. SECTION 2 addresses the pre-hospital and immediate in-hospital (ED) emergency cardiac care. SECTIONS 3-5 discuss patient monitoring, diagnosis and specific procedures. Acute coronary syndromes (ACS), acute decompensated heart failure (ADHF), and serious arrhythmias form SECTIONS 6-8. The main other cardiovascular acute conditions are grouped in SECTION 9. Finally SECTION 10 is dedicated to the many concomitant acute non-cardiovascular conditions that contribute to the patients' case mix in ICCU. This edition includes new chapters such as low cardiac output states and cardiogenic shock, and pacemaker and ICDs: troubleshooting and chapters have been extensively revised. Purchasers of the print edition will also receive an access code to access the online version of the textbook which includes additional figures, tables, and videos to better to better illustrate diagnostic and therapeutic techniques and procedures in IACC. The third edition of the ESC Textbook of Intensive and Acute Cardiovascular Care will establish a common basis of knowledge and a uniform and improved quality of care across the field.

Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Disability Determination for Individuals with Hearing Impairments, 2004-12-17 Millions of Americans experience some degree of hearing loss. The Social Security Administration (SSA) operates programs that provide cash disability benefits to people with permanent impairments like hearing loss, if they can show that their impairments meet stringent SSA criteria and their earnings are below an SSA threshold. The National Research Council convened an expert committee at the request of the SSA to study the issues related to disability determination for people with hearing loss. This volume is the product of that study. *Hearing Loss: Determining Eligibility for Social Security Benefits* reviews current knowledge about hearing loss and its measurement and treatment, and provides an evaluation of the strengths and weaknesses of the current processes and criteria. It recommends changes to strengthen the disability determination process and ensure its reliability and fairness. The book addresses criteria for selection of pure tone and speech tests, guidelines for test administration, testing of hearing in noise, special issues related to testing children, and the difficulty of predicting work capacity from clinical hearing test results. It should be useful to audiologists, otolaryngologists, disability advocates, and others who are concerned with people who have hearing loss.

For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DECIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.

This book presents an in-depth look at Dr. Stevenson's forty years studying children who claim to remember previous lives. It is an informative, professional read that dispels common misconceptions about reincarnation and offers an open-minded perspective. It provides an overview of the history of the belief in and evidence for reincarnation, with new material relating to birthmarks and birth defects, independent replication studies, and recent developments in genetic study. It also covers research on children, the methods used, the cases studied, and the analyses of the data. **acc submit your science: *Cute Accelerationism*** Amy Ireland, Maya B. Kronic, 2024-10-08 An impassioned philosophical celebration of the multiple dimensions of contemporary cuteness. Involuntarily sucked into the forcefield of Cute, Amy Ireland and Maya B. Kronic decided to let go, give in, let the demon ride them, and make an accelerationism out of it—only to realize that Cute opens a microcosmic gate onto the transcendental process of acceleration itself. Joining the swarming e-girls, t-girls, NEETS, anons, and otaku who rescued accelerationism from the double pincers of media panic and academic buzzkill by introducing it to big eyes, fluffy ears, programming socks, and silly memes, they discover that the objects of cute culture are just spinoffs of an accelerative process booping us from the future, rendering us all submissive, breedable, helpless, and cute in our turn. Cute comes tomorrow, and only anastrophe can make sense of what it will have been doing to us. Evading all discipline, sliding across all possible surfaces, *Cute Accelerationism* embraces every detail of the symptomatology, aetiology, epidemiology, history, biology, etymology, topology, and even embryology of Cute, joyfully burrowing down into its natural, cultural, sensory, sexual, subjective, erotic, and semiotic dimensions in order to sound out the latent spaces of this Thing that has soft-soaped its way into human culture. Traversing tangents on natural and unnatural selection, runaway supernormalisation, the collective self-transformation of genderswarming cuties, the hyperstitional cultures of shojo and otaku, denpa and 2D love, and the cute subworlds of aegyo and meng, moé and flatmaxxing, catboys and dogon eggs, bobbles and gummies, vore machines and partial objects, BwOs and UwUs...glomping, snuggling, smooshing and squeeeeing their way toward the event horizon of Cute, donning cat ears and popping bubbles as they go, in this untimely philosophical intensification of an omnipresent phenomenon, having surrendered to the squishiest demonic possession, like, ever, two bffs set out in search of the transcendental shape of cuteness only to realize that, even though it is all around us, we do not yet know what Cute can do. Seriously superficial and bafflingly coherent, half erudite philosophical treatise, half dariacore mashup, 100 percent cutagion, this compact lil' textual machine is a meltdown and a glow up, as well as a twizzled homage to Deleuze and Guattari's *A Thousand Plateaus*. Welcome to the kawaiiizome: nothing uncute makes it out of the near future, and the cute will very soon no longer be even

remotely human.
