abf cdl training program: The Big Rig Steve Viscelli, 2016-04-12 Long-haul trucks have been

described as sweatshops on wheels. The typical long-haul trucker works the equivalent of two full-time jobs, often for little more than minimum wage. But it wasn't always this way. Trucking used to be one of the best working-class jobs in the United States. The Big Rig explains how this massive degradation in the quality of work has occurred, and how companies achieve a compliant and dedicated workforce despite it. Drawing on more than 100 in-depth interviews and years of extensive observation, including six months training and working as a long-haul trucker, Viscelli explains in detail how labor is recruited, trained, and used in the industry. He then shows how inexperienced workers are convinced to lease a truck and to work as independent contractors. He explains how deregulation and collective action by employers transformed trucking's labor markets--once dominated by the largest and most powerful union in US history--into an important example of the costs of contemporary labor markets for workers and the general public.

abf cdl training program: Dictionary of Abbreviations in Medical Sciences Rolf Heister, 2012-12-06 Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.

Hundreds of beautiful, challenging, and instructive problems from algebra, geometry, trigonometry, combinatorics, and number theory were selected from numerous mathematical competitions and journals. An important feature of the work is the comprehensive background material provided with each grouping of problems. The problems are clustered by topic into self-contained sections with solutions provided separately. All sections start with an essay discussing basic facts and one or two representative examples. A list of carefully chosen problems follows and the reader is invited to take them on. Additionally, historical insights and asides are presented to stimulate further inquiry. The emphasis throughout is on encouraging readers to move

away from routine exercises and memorized algorithms toward creative solutions to open-ended problems. abf cdl training program: Space-Age Acronyms Reta C. Moser, 2012-12-06 Acronym agglomeration is an affliction of the age, and there are acronym addicts who, in their weakness, find it impossible to resist them. More than once in recent months my peers have cautioned me about my apparent readiness to use not only acronyms, but abbreviations, foreign isms, codes, and other cryptic symbols rather than common, ordinary American words. Many among us, though, either have not received or have chosen to ignore such advice. As a consequence, what we write and speak is

full of mystery and confusion. It is then for the reader and listener and for the writer and speaker that Reta C. Moser has compiled this guide. Its effective application to the art of communication is urged. Such use should help avoid many of the misunderstandings involving terminology which occur daily. Although such misunderstandings are certainly crucial in humanistic and social situations, they are often of immediate import and the trigger to disaster in scientific, technical, and political situations. Some 15,000 acronyms and 25,000 definitions are provided (a 50- and 47 -percent increase over the 1964 edition!), with due credit to Miss Moser's diligence in making the compilation and with the acknowledgment that the acronymical phenomenon is very much with us. This edition, like the first, is certain to be of value to writers, librarians, editors, and others who must identify and deal with acronyms.

abf cdl training program: *Strike for the Common Good* Rebecca Kolins Givan, Amy Schrager Lang, 2020-10-08 In February 2018, 35,000 public school educators and staff walked off the job in West Virginia. More than 100,000 teachers in other states—both right-to-work states, like West Virginia, and those with a unionized workforce—followed them over the next year. From Arizona, Kentucky, and Oklahoma to Colorado and California, teachers announced to state legislators that not only their abysmal wages but the deplorable conditions of their work and the increasingly straitened circumstances of public education were unacceptable. These recent teacher walkouts affirm public education as a crucial public benefit and understand the rampant disinvestment in public education not simply as a local issue affecting teacher paychecks but also as a danger to communities and to democracy. *Strike for the Common Good* gathers together original essays, written by teachers involved in strikes nationwide, by students and parents who have supported them, by journalists who have covered these strikes in depth, and by outside analysts (academic and otherwise). Together, the essays consider the place of these strikes in the broader landscape of recent labor organizing and battles over public education, and attend to the largely female workforce and, often, largely non-white student population of America's schools.

Two days later, in Waukesha, Wisconsin, he signed a Presidential Memorandum on Job-Driven Training for Workers, assigning Vice President Biden and the Secretaries of Labor, Commerce, and Education - working closely with the National Economic Council, the Domestic Policy Council, the Council of Economic Advisers, the Office of Science and Technology Policy, and the Office of Management and Budget - to develop within 180 days an action plan to make America's workforce and training system “more job-driven, integrated and effective.” The Presidential Memorandum called for this action plan to include “concrete steps to make federal workforce and training programs and policies more focused on imparting relevant skills with job-market value, more easily accessed by employers and job seekers, and more accountable for producing positive employment and earning outcomes for the people they serve.” Under the leadership of Vice President Biden, Secretary of Labor Tom Perez, Secretary of Commerce Penny Pritzker, and Secretary of Education Arne Duncan, the Administration engaged in an intensive review to identify, initiate, and implement actions to make federal employment and training programs and policies

more job-driven and effective, consistent with existing statutory authority. This review benefitted from the work not only of the Departments of Labor, Commerce, and Education, but also from the constructive engagement of Cabinet Secretaries and leaders of employment, training, education, and workforce development programs in the Departments of Agriculture, Defense, Energy, Health and Human Services, Housing and Urban Development, Interior, Justice, Transportation, Veterans Affairs, the Social Security Administration, and Environmental Protection Agency, and from the expertise of the Department of the Treasury, the National Science Foundation, and the Office of Personnel Management. The Presidential Memorandum on Job-Driven Training for Workers emphasized the importance of looking beyond our federal programs and agencies for answers and best practices, stating specifically that the Vice President and Secretaries “....shall consult with industry, employers and employer associations, state and local leaders, economic development organizations, worker representatives, education and training providers, workforce leaders, and relevant non-profit organizations.”
