american museum of natural history cafe: *The Mitsitam Cafe Cookbook* Richard Hetzler, Kevin Gover, Nicolasa I. Sandoval, 2010 Since the 2004 opening of the National Museum of the American Indian in Washington, DC, the museum's Mitsitam Cafe (mitsitam means let's eat in the Piscataway and Delaware languages) has become a destination in its own right. Featured on Rachael Ray's television show and praised by reviewers nationwide, the Mitsitam Cafe continues to receive accolades from both critics and visitors. Drawing upon tribal culinary traditions from five regions—Northern Woodlands, Great Plains, North Pacific Coast, Mesoamerica, and South America—the cafe's offerings feature staples that were once unknown in the rest of the world in dishes such as: Squash Blossom Soup Cedar-Planked, Fire-Roasted Salmon Pulled Buffalo Sandwich with Chayote Slaw Corn and Tomato Stew Cranberry Crumble Replete with beautiful photographs of the finished dishes as well as objects and archival photographs from the museum's vast collections, The Mitsitam Cafe Cookbook showcases the Americas' truly indigenous foods in ninety easy-to-follow, home-tested recipes. A 1995 graduate of the Baltimore International Culinary College, author Richard Hetzler worked at several fine-dining restaurants in the Washington, DC, and Baltimore area before joining the food-service firm Restaurant Associates at the Smithsonian. Hetzler was on the team that researched and developed the groundbreaking concept for the Mitsitam Cafe: serving indigenous foods that are the staples of five Native culture areas in North and South America. As the executive chef of the cafe, he continues to create and refine seasonal menus that showcase the Americas' native bounty.

american museum of natural history cafe: End of the Megafauna: The Fate of the World's Hugest, Fiercest, and Strangest Animals Ross D E MacPhee, 2018-11-13 The fascinating lives and puzzling demise of some of the largest animals on earth. Until a few thousand years ago, creatures that could have been from a sci-fi thriller—including gorilla-sized lemurs, 500-pound birds, and crocodiles that weighed a ton or more—roamed the earth. These great beasts, or “megafauna,” lived on every habitable continent and on many islands. With a handful of exceptions, all are now gone. What caused the disappearance of these prehistoric behemoths? No one event can be pinpointed as a specific cause, but several factors may have played a role. Paleomammalogist Ross D. E. MacPhee explores them all, examining the leading extinction theories, weighing the evidence, and presenting his own conclusions. He shows how theories of human overhunting and catastrophic climate change fail to account for critical features of these extinctions, and how new thinking is needed to elucidate these mysterious losses. Along the way, we learn how time is determined in earth history; how DNA is used to explain the genomics and phylogenetic history of megafauna—and how synthetic biology and genetic engineering may be able to reintroduce these giants of the past. Until then, gorgeous four-color illustrations by Peter Schouten re-create these megabeasts here in vivid detail.

american museum of natural history cafe: Russ & Daughters Mark Russ Federman, 2013-03-05 The former owner/proprietor of the beloved appetizing store on Manhattan's Lower East Side tells the delightful, mouthwatering story of an immigrant family's journey from a pushcart in 1907 to “New York's most hallowed shrine to the miracle of caviar, smoked salmon, ethereal herring, and silken chopped liver” (The New York Times Magazine). When Joel Russ started peddling herring from a barrel shortly after his arrival in America from Poland, he could not have imagined that he was giving birth to a gastronomic legend. Here is the story of this “Louvre of lox” (The Sunday Times, London): its humble beginnings, the struggle to keep it going during the Great Depression, the food rationing of World War II, the passing of the torch to the next generation as the flight from the Lower East Side was beginning, the heartbreaking years of neighborhood blight, and

the almost miraculous renaissance of an area from which hundreds of other family-owned stores had fled. Filled with delightful anecdotes about how a ferociously hardworking family turned a passion for selling perfectly smoked and pickled fish into an institution with a devoted national clientele, Mark Russ Federman's reminiscences combine a heartwarming and triumphant immigrant saga with a panoramic history of twentieth-century New York, a meditation on the creation and selling of gourmet food by a family that has mastered this art, and an enchanting behind-the-scenes look at four generations of people who are just a little bit crazy on the subject of fish. american museum of natural history cafe: We Have No Idea Jorge Cham, Daniel Whiteson, 2018-05-08 Prepare to learn everything we still don't know about our strange and mysterious universe Humanity's understanding of the physical world is full of gaps. Not tiny little gaps you can safely ignore —there are huge yawning voids in our basic notions of how the world works. PHD Comics creator Jorge Cham and particle physicist Daniel Whiteson have teamed up to explore everything we don't know about the universe: the enormous holes in our knowledge of the cosmos. Armed with their popular infographics, cartoons, and unusually entertaining and lucid explanations of science, they give us the best answers currently available for a lot of questions that are still perplexing scientists, including: * Why does the universe have a speed limit? * Why aren't we all made of antimatter? * What (or who) is attacking Earth with tiny, superfast particles? * What is dark matter, and why does it keep ignoring us? It turns out the universe is full of weird things that don't make any sense. But Cham and Whiteson make a compelling case that the questions we can't answer are as interesting as the ones we can. This fully illustrated introduction to the biggest mysteries in physics also helpfully demystifies many complicated things we do know about, from quarks and neutrinos to gravitational waves and exploding black holes. With equal doses of humor and delight, Cham and Whiteson invite us to see the universe as a possibly boundless expanse of uncharted territory that's still ours to explore.

american museum of natural history cafe: In a Cafe Mary Lavin, 1999 On an island teeming with masters of the short story, Mary Lavin's distinct voice and devoted following set her apart. Before her death in 1996, this Irish writer had received many honors and prizes not only for her luminous short stories but also for several highly regarded novels. William Trevor praised Lavin's ability to make moments timeless, to illuminate people and places, words and things, by touching

them with the magic of the rarely-gifted storyteller. In a Cafe makes available for the first time in the United States a collection of her most beloved pieces as compiled by her daughter. In masterworks such as the title story, an unsettling portrayal of widowhood, and The Will, which Layin considered the finest expression of her art, the justice in Trevor's declaration we recognize that the short story of today owes her a very great debt.

american museum of natural history cafe: Savoring Gotham, 2015-11-11 When it comes to food, there has never been another city quite like New York. The Big Apple--a telling nickname--is the city of 50,000 eateries, of fish wriggling in Chinatown baskets, huge pastrami sandwiches on rye, fizzy egg creams, and frosted black and whites. It is home to possibly the densest concentration of ethnic and regional food establishments in the world, from German and Jewish delis to Greek diners, Brazilian steakhouses, Puerto Rican and Dominican bodegas, halal food carts, Irish pubs, Little Italy, and two Koreatowns (Flushing and Manhattan). This is the city where, if you choose to have Thai for dinner, you might also choose exactly which region of Thailand you wish to dine in. Savoring Gotham weaves the full tapestry of the city's rich gastronomy in nearly 570 accessible, informative A-to-Z entries. Written by nearly 180 of the most notable food experts--most of them New Yorkers--Savoring Gotham addresses the food, people, places, and institutions that have made New York cuisine so wildly diverse and immensely appealing. Reach only a little ways back into the city's ever-changing culinary kaleidoscope and discover automats, the precursor to fast food restaurants, where diners in a hurry dropped nickels into slots to unlock their premade meal of choice. Or travel to the nineteenth century, when oysters cost a few cents and were pulled by the bucketful from the Hudson

River. Back then the city was one of the major centers of sugar refining, and of brewing, too--48 breweries once existed in Brooklyn alone, accounting for roughly 10% of all the beer brewed in the United States. Travel further back still and learn of the Native Americans who arrived in the area 5,000 years before New York was New York, and who planted the maize, squash, and beans that European and other settlers to the New World embraced centuries later. Savoring Gotham covers New York's culinary history, but also some of the most recognizable restaurants, eateries, and culinary personalities today. And it delves into more esoteric culinary realities, such as urban farming, beekeeping, the Three Martini Lunch and the Power Lunch, and novels, movies, and paintings that memorably depict Gotham's foodscapes. From hot dog stands to haute cuisine, each borough is represented. A foreword by Brooklyn Brewery Brewmaster Garrett Oliver and an extensive bibliography round out this sweeping new collection.

american museum of natural history cafe: Jerusalem, 1000-1400 Barbara Drake Boehm , Melanie Holcomb, 2016-09-14 Medieval Jerusalem was a vibrant international center, home to multiple cultures, faiths, and languages. Harmonious and dissonant voices from many lands, including Persians, Turks, Greeks, Syrians, Armenians, Georgians, Copts, Ethiopians, Indians, and Europeans, passed in the narrow streets of a city not much larger than midtown Manhattan. Patrons, artists, pilgrims, poets, and scholars from Christian, Jewish, and Islamic traditions focused their attention on the Holy City, endowing and enriching its sacred buildings, creating luxury goods for its residents, and praising its merits. This artistic fertility was particularly in evidence between the eleventh and fourteenth centuries, notwithstanding often devastating circumstances—from the earthquake of 1033 to the fierce battles of the Crusades. So strong a magnet was Jerusalem that it

drew out the creative imagination of even those separated from it by great distance, from as far north as Scandinavia to as far east as present-day China. This publication is the first to define these four centuries as a singularly creative moment in a singularly complex city. Through absorbing essays and incisive discussions of nearly 200 works of art, *Jerusalem, 1000-1400: Every People Under Heaven* explores not only the meaning of the city to its many faiths and its importance as a destination for tourists and pilgrims but also the aesthetic strands that enhanced and enlivened the medieval city that served as the crossroads of the known world.

american museum of natural history cafe: The Story of the Human Body Daniel Lieberman, 2014-07-01 A landmark book of popular science that gives us a lucid and engaging account of how the human body evolved over millions of years—with charts and line drawings throughout. "Fascinating.... A readable introduction to the whole field and great on the making of our physicality."—*Nature* In this book, Daniel E. Lieberman illuminates the major transformations that contributed to key adaptations to the body: the rise of bipedalism; the shift to a non-fruit-based diet; the advent of hunting and gathering; and how cultural changes like the Agricultural and Industrial Revolutions have impacted us physically. He shows how the increasing disparity between the jumble of adaptations in our Stone Age bodies and advancements in the modern world is occasioning a paradox: greater longevity but increased chronic disease. And finally—provocatively—he advocates the use of evolutionary information to help nudge, push, and sometimes even compel us to create a more salubrious environment and pursue better lifestyles.

american museum of natural history cafe: Places of Invention Arthur P. Molella, Anna Karvellas, 2015-06-30 The companion book to an upcoming museum exhibition of the same name, *Places of Invention* seeks to answer timely questions about the nature of invention and innovation: What is it about some places that sparks invention and innovation? Is it simply being at the right

place at the right time, or is it more than that? How does “place”—whether physical, social, or cultural—support, constrain, and shape innovation? Why does invention flourish in one spot but struggle in another, even very similar location? In short: Why there? Why then? *Places of Invention* frames current and historic conversation on the relationship between place and creativity, citing extensive scholarship in the area and two decades of investigation and study from the National Museum of American History’s Lemelson Center for the Study of Invention and Innovation. The book is built around six place case studies: Hartford, CT, late 1800s; Hollywood, CA, 1930s; Medical Alley, MN, 1950s; Bronx, NY, 1970s; Silicon Valley, CA, 1970s–1980s; and Fort Collins, CO, 2010s. Interspersed with these case studies are dispatches from three “learning labs” detailing Smithsonian Affiliate museums’ work using *Places of Invention* as a model for documenting local invention and innovation. Written by exhibition curators, each part of the book focuses on the central thesis that invention is everywhere and fueled by unique combinations of creative people, ready resources, and inspiring surroundings. Like the locations it explores, *Places of Invention* shows how the history of invention can be a transformative lens for understanding local history and cultivating creativity on scales of place ranging from the personal to the national and beyond.

american museum of natural history cafe: The Automat Lorraine B. Diehl, Marianne Hardart, 2002 On the 100th birthday of Horn & Hardart, a look back at one of America’s most beloved institutions A coin-operated glass-and-chrome wonder, Horn & Hardart’s Automats revolutionized the way Americans ate when they opened up in Philadelphia and New York in the early twentieth century. In a country where the industrial revolution had just taken hold, eating at a restaurant with self-serving vending machines rather than waitresses and Art Deco architecture instead of stuffy dining rooms was an unforgettable experience. The Automat served freshly made food for the price of a few coins, and no one made a better cup of coffee. By the peak of its popularity—from the Great Depression to the post-war years—the Automat was more than an inexpensive place to buy a good meal; it was a culinary treasure, a technical marvel, and an emblem of the times. The Automat will take readers back to the days of Charles Lindbergh and Babe Ruth, Walter Winchell and Jack Benny, the Brooklyn Dodgers and shows at Radio City. Through beautiful archival photography, candid interviews, delicious recipes, and wonderfully evocative memorabilia, Lorraine Diehl and Marianne Hardart bring to life a time when a handful of nickels and the twist of a wrist bought a good square meal—Macaroni and Cheese, Boston Baked Beans, Chicken Pot Pie, Rice Pudding, and all the other favorites whose recipes are in these pages. The Automat was a true American treasure, and here is its tribute. “I have always thought that the Automat in New York has the best scrambled eggs in the world.” —Gregory Peck “To have your own stack of nickels placed in your tiny hands; to be able to choose your own food, richly on display like museum pieces; to make quick and final decisions at the age of eight; this was a lesson in financial dealings that not even two

years at the Wharton School could buy today.” —Neil Simon “Oh, be still my heart! I used to shine shoes when I was fourteen years old. And when I was a little ahead, I would stop at Horn & Hardart.” —Tony Curtis “I lived at the Automat. They had the greatest chocolate milk. When I moved to Philadelphia, I apportioned less than two dollars a day to eat on, and the Automat was the only place I could do it.” —Dick Clark “I went to the Automat all the time.
