ampak technology unknown device: **Political Communication and COVID-19** Darren Lilleker, Ioana A. Coman, Miloš Gregor, Edoardo Novelli, 2021-03-18 This edited collection compares and analyses the most prominent political communicative responses to the outbreak and global spread of the COVID-19 strain of coronavirus within 27 nations across five continents and two supranational organisations: the EU and the WHO. The book encompasses the various governments' communication of the crisis, the role played by opposition and the vibrancy of the information environment within each nation. The chapters analyse the communication drawing on theoretical perspectives drawn from the fields of crisis communication, political communication and political psychology. In doing so the book develops a framework to assess the extent to which state communication followed the key indicators of effective communication encapsulated in the principles of: being first; being right; being credible; expressing empathy; promoting action; and showing respect. The book also examines how communication circulated within the mass and social media environments and what impact differences in spokespersons, messages and the broader context has on the success of implementing measures likely to reduce the spread of the virus. Cumulatively, the authors develop a global analysis of the responses and how these are shaped by their specific contexts and by the flow of information, while offering lessons for future political crisis communication. This book will be of great interest to students and researchers of politics, communication and public relations, specifically on courses and modules relating to current affairs, crisis communication and strategic communication, as well as practitioners working in the field of health crisis communication. ampak technology unknown device: Liberal Democracy in Crisis

Alen Toplišek, 2018-10-02 This book rethinks resistance against neoliberalism in the context of the crisis of Western liberal democracy and the rise of new radical left parties in Europe. Drawing upon a wide range of methodological approaches in contemporary political and social theory, it explores how the aftermath of the 2008 financial crisis represents the opening of possibilities for resistance and examines the structural hurdles facing radical politics in effectively challenging neoliberalism. The author challenges the dominant conceptions of democratic politics by critically interrogating the role of liberalism in the depoliticisation of governing and the neoliberal restructuring of the democratic role of the state. The trajectory of new radical left parties in Slovenia, Greece and Spain is used to demonstrate the need to overcome the binary divide between institutional politics and resistance in radical political theory and practice.

ampak technology unknown device: Post-Heroic Leadership

Miha Škerlavaj, 2022-01-03 This pioneering new book sets out to categorize context, process, and outcomes of post-heroic leadership. Complexities of modern business environment along with fundamental functioning of human psychology require us to make a paradigm shift in the way we perceive and practice effective leadership. The author argues that in order for businesses to succeed in the times to come, leaders need to move away from ego-centered leadership toward post-heroic leadership – a leadership that emphasizes servant and shared practices, puts task and collective front and center and leaders' ego in the background. Providing a deeper understanding of the post-heroic leadership across industries and disciplines, the book starts by elaborating on the zeitgeist and need for a new type of leadership. It highlights the process and elements of post-heroic leadership in action, such as post-heroically leading change, developing culture of trust with feedback, and sustainable and responsible post-heroic leadership. Finally, the book focuses on the outcomes of post-heroic leadership, including resilience and innovation. Featuring mini-case studies from leaders in healthcare, family entertainment, ICT, haute cuisine, and manufacturing to name a few, this book provides a thorough understanding of this new wave of leadership and a platform for further research.

ampak technology unknown device: The Chemical Evolution of Phosphorus Enrique Macia-Barber, 2019-11-21 Here is a fascinating reader-friendly exploration of “the phosphorus enigma.” The volume attempts to answer the questions: How did phosphorus atoms, which are produced inside the inner cores of a handful of huge stars, become concentrated in relatively high proportions in the organisms composing Earth’s biosphere? And how did these phosphate derivatives manage to be included in such a great variety of organic molecules playing essential biochemical roles in all known life forms? Due to the interdisciplinary nature of the topic, the volume is arranged in three sections. The first section introduces the fundamental concepts and notions of physics, chemistry, and biology necessary for the proper understanding of the topics discussed within an astronomical framework. The author then focuses on the role of phosphorus and its compounds within the context of chemical evolution in galaxies, considering its relevance in most essential biochemical functions as well as its peculiar chemistry under different physicochemical conditions. The third section provides an overall perspective on the role of phosphorus and its compounds in current areas of research of solid state physics, materials engineering, nanotechnology or medicine.

Or that there was a secret Soviet plan to land a Russian on the Moon before the US? Paolo Attivissimo is a British-Italian science journalist, lifelong space enthusiast and contributor to NASA's Apollo Lunar Surface Journal.

of realism in art that portrays and reveals evidence from complex social systems. ...Evidentiary Realism focuses on artworks that prioritize formal aspects of visual language and mediums; diverging from journalism and reportage, they strive to provoke visual pleasure and emotional responses. The evidence is presented through photography, film, drawing, painting, and sculpture, with strong references to art history. ampak technology unknown device: Before Boas Han F. Vermeulen, 2015-07 The history of anthropology has been written from multiple viewpoints, often from perspectives of gender, nationality, theory, or politics. Before Boas delves deeper into issues concerning anthropology's academic origins to present a groundbreaking study that reveals how ethnography and ethnology originated during the eighteenth rather than the nineteenth century, developing parallel to anthropology, or the natural history of man. Han F. Vermeulen explores primary and secondary sources from Russia, Germany, Austria, the United States, the Netherlands, Hungary, the Czech Republic, Slovakia, France, and Great Britain in tracing how ethnography originated as field research by German-speaking historians and naturalists in Siberia (Russia) during the 1730s and 1740s, was generalized as ethnology by scholars in Göttingen (Germany) and Vienna (Austria) during the 1770s and 1780s, and was subsequently adopted by researchers in other countries. Before Boas argues that anthropology and ethnology were separate sciences during the Age of Reason, studying racial and ethnic diversity, respectively. Ethnography and ethnology focused not on other cultures but on all peoples of all eras. Following G. W. Leibniz, researchers in these fields categorized peoples primarily according to their languages. Franz Boas professionalized the holistic study of anthropology from the 1880s into the twentieth century.

ampak technology unknown device: Changing News Use Irene Costera Meijer, Tim Groot Kormelink, 2020-11-09 Changing News Use pulls from empirical research to introduce and describe how changing news user patterns and journalism practices have been mutually disruptive, exploring what journalists and the news media can learn from these changes. Based on 15 years of audience research, the authors provide an in-depth description of what people do with news and how this has diversified over time, from reading, watching, and listening to a broader spectrum of user practices including checking, scrolling, tagging, and avoiding. By emphasizing people's own experience of journalism, this book also investigates what two prominent audience measurements - clicking and spending time - mean from a user perspective. The book outlines ways to overcome the dilemma of

providing what people apparently want (attentiongrabbing news features) and delivering what people apparently need (what journalists see as important information), suggesting alternative ways to investigate and become sensitive to the practices, preferences, and pleasures of audiences and discussing what these research findings might mean for everyday journalism practice. The book is a valuable and timely resource for academics and researchers interested in the fields of journalism studies, sociology, digital media, and communication.

ampak technology unknown device: *Live TV from the Moon* Dwight Steven-Boniecki, 2010 Book & DVD. The further the lunar landings regress into history, the more important the TV images have become. Until now the background story of this important footage has been overlooked. The TV systems used on Apollo were not without controversy. When President Kennedy issued the challenge to successfully land men on the moon and return them safely to earth by the end of the 1960's, NASA unwittingly found itself facing a two-fold predicament. Should the American taxpayer be privy to a front row seat via television, and would it be possible to develop compact TV cameras for just such a purpose within the allotted timeframe? Drawing upon the skill and knowledge of RCA and Westinghouse engineers a series of TV cameras were developed which revolutionised not only space exploration, but electronic news gathering as a whole. This book covers everything from the earliest known proposals of lunar TV coverage, and on through the political battles that ultimately led to the TV system which flew on the Apollo missions. The book takes what some may see as a very sterile or niche topic, and extends it into an interesting subject anyone can understand and appreciate. This book can be compared to the Making of. . . documentaries which often accompany feature films. For the first time, the live telecasts from the moon are given their own complete Making of. . . account.

ampak technology unknown device: *Maple King* Matthew M. Thomas, 2018-03-19 Like many North American industries in the late nineteenth and early twentieth centuries, the business of making maple sugar and syrup went through a period of maturation and modernization. Much of this change and new business model was influenced and controlled by one man and the company he

created in St. Johnsbury, Vermont. George C. Cary and the Cary Maple Sugar Company grew in size and influence such that it controlled as much as 80 percent of the bulk maple sugar market, bestowing on Cary the title of Maple King and St. Johnsbury as the Maple Capital of the World. This book recounts the rise of the Cary Company and takes a closer look at who Cary was and the maple sugar and maple syrup empire that he created. As encompassing as the Cary Empire was, it overreached its limits and came tumbling to the ground with the stunning bankruptcy and death of its leader in 1931. However, Cary's legacy did not die with him, and as told here, St. Johnsbury continued to have a significant place and role in the ever-evolving maple sugar and syrup industry.
