**ann timmer political affiliation:** Immigration Wars Jeb Bush, Clint Bolick, 2013 The immigration debate divides Americans more stridently than ever, due to a chronic failure of national leadership by both parties. Bush and Bolick propose a six-point strategy for reworking our policies that begins with erasing all existing, outdated immigration structures and starting over. Their strategy is guided by two core principles: first, immigration is vital to America's future; second, any enduring resolution must adhere to the rule of law.

**ann timmer political affiliation:** The Choices Justices Make Lee Epstein, Jack Knight, 1997-01-01 The Choices Justices Make is a groundbreaking work that offers a strategic account of Supreme Court decision making. Justices realize that their ability to achieve their policy and other goals depends on the preferences of other actors, the choices they expect others to make, and the institutional context in which they act. All these factors hold sway over justices as they make their decisions, from which cases to accept, to how to interact with their colleagues, and what policies to adopt in their opinions. Choices is a thought-provoking, yet nontechnical work that is an ideal supplement for judicial process and public law courses. In addition to offering a unique and sustained theoretical account, the authors tell a fascinating story of how the Court works. Data culled from the Court's public records and from the private papers of Justices Brennan, Douglas, Marshall, and Powell provide empirical evidence to support the central argument, while numerous examples from the justices' papers animate the work.

**ann timmer political affiliation:** *Wellbeing, Freedom and Social Justice* Ingrid Robeyns, 2017-12-11 How do we evaluate ambiguous concepts such as wellbeing, freedom, and social justice? How do we develop policies that offer everyone the best chance to achieve what they want from life? The capability approach, a theoretical framework pioneered by the philosopher and economist Amartya Sen in the 1980s, has become an increasingly influential way to think about these issues. *Wellbeing, Freedom and Social Justice: The Capability Approach Re-Examined* is both an introduction to the capability approach and a thorough evaluation of the challenges and disputes that have engrossed the scholars who have developed it. Ingrid Robeyns offers her own illuminating and rigorously interdisciplinary interpretation, arguing that by appreciating the distinction between the general capability approach and more specific capability theories or applications we can create a powerful and flexible tool for use in a variety of academic disciplines and fields of policymaking. This book provides an original and comprehensive account that will appeal to scholars of the capability approach, new readers looking for an interdisciplinary introduction, and those interested in theories of justice, human rights, basic needs, and the human development approach.

**ann timmer political affiliation:** *World Development Report 2017* World Bank Group, 2017-01-23 Why are carefully designed, sensible policies too often not adopted or implemented? When they are, why do they often fail to generate development outcomes such as security, growth, and equity? And why do some bad policies endure? *World Development Report 2017: Governance and the Law* addresses these fundamental questions, which are at the heart of development. Policy making and policy implementation do not occur in a vacuum. Rather, they take place in complex political and social settings, in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests. The process of these interactions is what this Report calls governance, and the space in which these interactions take place, the policy arena. The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for effectiveness. However, who bargains, who is excluded, and what barriers block entry to the policy arena determine the selection and implementation of policies and, consequently, their impact on development outcomes. Exclusion, capture, and clientelism are manifestations of power asymmetries that lead to failures to achieve security, growth, and equity. The distribution of power in society is partly determined by history. Yet, there is room for positive change. This Report reveals that governance can mitigate, even overcome, power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security, growth, and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes, and taking into account the interests of previously excluded participants. These changes can come about through bargains among elites and greater citizen engagement, as well as by international actors supporting rules that strengthen coalitions for reform.

It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

Their People Come, Lant Pritchett discusses five irresistible forces of global labor migration, and the immovable ideas that form a political backlash against it. Increasing wage gaps, different demographic futures, everything but labor globalization, and the continued employment growth in low skilled, labor intensive industries all contribute to the forces compelling labor to migrate across national borders. Pritchett analyzes the fifth irresistible force of ghosts and zombies, or the rapid and massive shifts in desired populations of countries, and says that this aspect has been neglected in the discussion of global labor mobility. Let Their People Come provides six policy recommendations for unskilled immigration policy that seek to reconcile the irresistible force of migration with the immovable ideas in rich countries that keep this force in check. In clear, accessible prose, this volume explores ways to regulate migration flows so that they are a benefit to both the global North and global South.

**ann timmer political affiliation: Cultural Politics of Emotion** Sara Ahmed, 2014-06-11 Emotions work to define who we are as well as shape what we do and this is no more powerfully at play than in the world of politics. Ahmed considers how emotions keep us invested in relationships of power, and also shows how this use of emotion could be crucial to areas such as feminist and queer politics. Debates on international terrorism, asylum and migration, as well as reconciliation and reparation, are explored through topical case studies. In this book the difficult issues are confronted head on. The Cultural Politics of Emotion is in dialogue with recent literature on emotions within gender studies, cultural studies, sociology, psychology and philosophy. Throughout the book, Ahmed develops a theory of how emotions work, and the effects they have on our day-to-day lives. **ann timmer political affiliation: Community, Scale, and Regional Governance** Liesbet Hooghe, Gary Marks, Arjan H. Schakel, Sara Niedzwiecki, Sandra Chapman Osterkatz, Sarah Shair-Rosenfield, 2016 This is the second of five ambitious volumes theorizing the structure of governance above and below the central state. This book is written for those interested in the character, causes, and consequences of governance within the state. The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self-government. The first has to do with the character of the public goods provided by government: their scale economies, externalities, and informational asymmetries. The second has to do with how people conceive and construct the groups to which they feel themselves belonging. In this book, the authors demonstrate that scale and community are principles that can help explain some basic features of governance, including the growth of multiple tiers over the past six decades, how jurisdictions are designed, why governance within the state has become differentiated, and the extent to which regions exert authority. The authors propose a postfunctionalist theory which rejects the notion that form follows function, and argue that whilst functional pressures are enduring, one must engage human passions regarding self-rule to explain variation in the structures of rule over time and around the world. Transformations in Governance is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions, down to subnational governments, and side-ways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series targets mainly single-authored or co-authored work, but it is pluralistic in terms of disciplinary specialization, research design, method, and geographical scope. Case studies as well as comparative studies, historical as well as contemporary studies, and studies with a national, regional, or international

focus are all central to its aims. Authors use qualitative, quantitative, formal modeling, or mixed methods. A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and the VU Amsterdam, and Walter Mattli of the University of Oxford.

**ann timmer political affiliation:** *Poverty and Shared Prosperity 2016* World Bank Group, 2016-10-12 *Poverty and Shared Prosperity 2016* is the first of an annual flagship report that will inform a global audience comprising development practitioners, policy makers, researchers, advocates, and citizens in general with the latest and most accurate estimates on trends in global poverty and shared prosperity. This edition will also document trends in inequality and identify recent country experiences that have been successful in reducing inequalities, provide key lessons from those experiences, and synthesize the rigorous evidence on public policies that can shift inequality in a way that bolsters poverty reduction and shared prosperity in a sustainable manner. Specifically, the report will address the following questions: • What is the latest evidence on the levels and evolution of extreme poverty and shared prosperity? • Which countries and regions have been more successful in terms of progress toward the twin goals and which are lagging behind? • What does the global context of lower economic growth mean for achieving the twin goals? • How can inequality reduction contribute to achieving the twin goals? • What does the evidence show concerning global and between- and within-country inequality trends? • Which interventions and countries have used the most innovative approaches to achieving the twin goals through reductions in inequality? The report will make four main contributions. First, it will present the most recent numbers on poverty, shared prosperity, and inequality. Second, it will stress the importance of inequality reduction in ending poverty and boosting shared prosperity by 2030 in a context of weaker growth. Third, it will highlight the diversity of within-country inequality reduction experiences and will synthesize experiences of successful countries and policies, addressing the roots of inequality without compromising economic growth. In doing so, the report will shatter some myths and sharpen our knowledge of what works in reducing inequalities. Finally, it will also advocate for the need to expand and improve data collection—for example, data availability, comparability, and quality—and rigorous evidence on inequality impacts in order to deliver high-quality poverty and shared prosperity monitoring.

How can policymakers and practitioners better comprehend the many forms and shapes that this socialpandemic takes? From the delivery of essential drugs, the reduction in teacher absenteeism, the containment of illegal logging, the construction of roads, the provision of water andelectricity, the international trade in oil and gas, the conduct of public budgeting and procurement, and the management of public revenues, corruption shows its many faces. 'The Many Faces of Corruption' attempts to bring greater clarity to the often murky manifestations of this virulent and debilitating social disease. It explores the use of prototype road maps to identify corruption vulnerabilities, suggests corresponding 'warning signals,' and proposes operationally useful remedial measures in each of several selected sectors and for a selected sampleof cross cutting public sector functions that are particularlyprone to corruption and that are critical to sector performance.Numerous technical experts have come together in this effort to develop an operationally useful approach to diagnosing and tackling corruption. 'The Many Faces of Corruption' is an invaluable reference for policymakers, practitioners, andresearchers engaged in the business of development.*

**ann timmer political affiliation:** *World Development Report 2020* World Bank, 2019-11-19 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw

production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

**ann timmer political affiliation: The Force of Nonviolence** Judith Butler, 2020-02-04 Judith Butler's new book shows how an ethic of nonviolence must be connected to a broader political struggle for social equality. Further, it argues that nonviolence is often misunderstood as a passive practice that emanates from a calm region of the soul, or as an individualist ethical relation to existing forms of power. But, in fact, nonviolence is an ethical position found in the midst of the political field. An aggressive form of nonviolence accepts that hostility is part of our psychic constitution, but values ambivalence as a way of checking the conversion of aggression into violence. One contemporary challenge to a politics of nonviolence points out that there is a difference of opinion on what counts as violence and nonviolence. The distinction between them can be mobilised in the service of ratifying the state's monopoly on violence. Considering nonviolence as an ethical problem within a political philosophy requires a critique of individualism as well as an understanding of the psychosocial dimensions of violence. Butler draws upon Foucault, Fanon, Freud, and Benjamin to consider how the interdiction against violence fails to include lives regarded as ungrievable. By considering how 'racial phantasms' inform justifications of state and administrative violence, Butler tracks how violence is often attributed to those who are most severely exposed to its lethal effects. The struggle for nonviolence is found in movements for social transformation that reframe the grievability of lives in light of social equality and whose ethical claims follow from an insight into the interdependency of life as the basis of social and political equality.

**ann timmer political affiliation: Global Economic Prospects 2007** World Bank, 2006 Over the next 25 years developing countries will move to center stage in the global economy. Global Economic Prospects 2007 analyzes the opportunities - and stresses - this will create. While rich and poor countries alike stand to benefit, the integration process will make more acute stresses already apparent today - in income inequality, in labor markets, and in the environment. Over the next 25 years, rapid technological progress, burgeoning trade in goods and services, and integration of financial markets create the opportunity for faster long-term growth. However, some regions, notably Africa, are at risk of being left behind. The coming globalization will also see intensified stresses on the global commons. Addressing global warming, preserving marine fisheries, and containing infectious diseases will require effective multilateral collaboration to ensure that economic growth and poverty reduction proceed without causing irreparable harm to future generations.

**ann timmer political affiliation: Wind Energy Explained** James F. Manwell, Jon G. McGowan, Anthony L. Rogers, 2010-09-14 Wind energy's bestselling textbook- fully revised. This must-have second edition includes up-to-date data, diagrams, illustrations and thorough new material on: the fundamentals of wind turbine aerodynamics; wind turbine testing and modelling; wind turbine design standards; offshore wind energy; special purpose applications, such as energy storage and fuel production. Fifty additional homework problems and a new appendix on data processing make this comprehensive edition perfect for engineering students. This book offers a complete examination of one of the most promising sources of renewable energy and is a great introduction to this cross-disciplinary field for practising engineers. "provides a wealth of information and is an excellent reference book for people interested in the subject of wind energy." (IEEE Power & Energy Magazine, November/December 2003) "deserves a place in the library of every university and college where renewable energy is taught." (The International Journal of Electrical Engineering Education, Vol.41, No.2 April 2004) "a very comprehensive and well-organized treatment of the

current status of wind power.” (Choice, Vol. 40, No. 4, December 2002)

They address the significance of Islamic theories of property and Islamic land tenure regimes on the 'webs of tenure' prevalent in the Muslim societies. They consider the possibility of using Islamic legal and human rights systems for the development of inclusive, pro-poor approaches to land rights. They also focus on Muslim women's rights to property and inheritance systems. Engaging with institutions such as the Islamic endowment (waqf) and principles of Islamic microfinance, they test the workability of 'authentic' Islamic proposals. Located in human rights as well as Islamic debates, this study offers a well researched and constructive appraisal of property and land rights in the Muslim world.

**ann timmer political affiliation:** *World Development Report 2016* World Bank Group, 2016-01-14 Digital technologies are spreading rapidly, but digital dividends--the broader benefits of faster growth, more jobs, and better services--are not. If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone, why can't others around the world do the same? If 8 million entrepreneurs in China--one third of them women--can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And if India can provide unique digital identification to 1 billion people in five years, and thereby reduce corruption by billions of dollars, why can't other countries replicate its success? Indeed, what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents, but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater, but not when the labor market is polarized. The internet can be a platform for universal empowerment, but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its 'analog complements'--the regulations that promote entry and competition, the skills that enable workers to access and then leverage the new economy, and the institutions that are accountable to citizens--have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What, then, should countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone, everywhere.

**ann timmer political affiliation:** *Parenting Matters* National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family--which includes all primary caregivers--are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and

services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**ann timmer political affiliation: Moral Status** Mary Anne Warren, 1997-11-13 Mary Anne Warren explores a theoretical question which lies at the heart of practical ethics: what are the criteria for having moral status? In other words, what are the criteria for being an entity towards which people have moral obligations? Some philosophers maintain that there is one intrinsic property—for instance, life, sentience, humanity, or moral agency. Others believe that relational properties, such as belonging to a human community, are more important. In Part I of the book, Warren argues that no single property can serve as the sole criterion for moral status; instead, life, sentience, moral agency, and social and biotic relationships are all relevant, each in a different way. She presents seven basic principles, each focusing on a property that can, in combination with others, legitimately affect an agent's moral obligations towards entities of a given type. In Part II, these principles are applied in an examination of three controversial ethical issues: voluntary euthanasia, abortion

**ann timmer political affiliation: Agricultural Household Models** Inderjit Singh, Lyn Squire, John Strauss, 1986 This book presents the basic model of an agricultural household that underlies most of the case studies undertaken so far. The model assumes that households are price-takers and is therefore recursive. The decisions modeled include those affecting production and the demand for inputs and those affecting consumption and the supply of labor. Comparative results on selected elasticities are presented for a number of economies. The empirical significance of the approach is demonstrated in a comparison of models that treat production and consumption decisions separately and those in which the decisionmaking process is recursive. The book summarizes the implications of agricultural pricing policy for the welfare of farm households, marketed surplus, the demand for nonagricultural goods and services, the rural labor market, budget revenues, and foreign exchange earnings. In addition, it is shown that the basic model can be extended in order to explore the effects of government policy on crop composition, nutritional status, health, saving, and investment and to provide a more comprehensive analysis of the effects on budget revenues and foreign exchange earnings. Methodological topics, primarily the data requirements of the basic model and its extensions, along with aggregation, market interaction, uncertainty, and market imperfections are discussed. The most important methodological issues - the question of the recursive property of these models - is also discussed.

Hulten, 2010-02-15 Although inflation is much feared for its negative effects on the economy, how to measure it is a matter of considerable debate that has important implications for interest rates, monetary supply, and investment and spending decisions. Underlying many of these issues is the concept of the Cost-of-Living Index (COLI) and its controversial role as the methodological foundation for the Consumer Price Index (CPI). *Price Index Concepts and Measurements* brings together leading experts to address the many questions involved in conceptualizing and measuring inflation. They evaluate the accuracy of COLI, a Cost-of-Goods Index, and a variety of other methodological frameworks as the bases for consumer price construction.

**ann timmer political affiliation: International Immigration Policy** Eytan Meyers, 2004-04-02 Numerous studies explore immigration policies of individual receiving countries. But these studies share several weaknesses. First and foremost, they are empirically orientated and lack a general theory. Second, most examine the policy of single country during a limited period, or, in a few cases, are contributed volumes analyzing each country separately. In general, immigration policy literature tends to be a-theoretic, to focus on specific periods and particular countries, and constitutes an array of discrete bits. This book is a response to this trend, offering a theoretical approach to immigration policy. It explains how governments decide on the number of immigrants they will accept; whether to differentiate between various ethnic groups; whether to accept refugees and on what basis; and whether to favour permanent immigration over migrant workers. The book also answers such questions as: How much influence do extreme-right parties have on the determination of immigration policy? Why do anti-immigration parties and initiatives enjoy greater success in local-state elections, and in the elections for the European Parliament, than in national elections? And under what circumstances does immigration policy become an electoral issue? Meyers draws on a wide array of sources on migration policy-making and using them derives proposed models in a way that few others have done before him. In addition, the book interrelates global and domestic factors that jointly influence government policy-making on international migration in a way that helps to clarify both spheres. Lastly, the work combines historical data with contemporary processes, in a way that draws lessons from the past while recognizing that changing circumstances usually revise governmental responses.

**ann timmer political affiliation: Oil Windfalls** Alan H. Gelb, 1988 This book assesses the full impact of oil windfalls on six developing producer countries - Algeria, Ecuador, Indonesia, Nigeria, Trinidad and Tobago, and Venezuela. This is the first time that the issue has been systematically

analysed and related to economics policies and underlying macroeconomic characteristics. The book adopts a broad approach, blending institutional and political aspects with quantitative analysis which includes the results of sophisticated model simulations. It presents new information on how oil discoveries have been used by producer governments, and analyses of the consequences. Finally it concludes that much of the potential benefit to producers has been dissipated, and explains why producers may actually end up worse off despite revenue gains.

**ann timmer political affiliation:** **Upgrading to Compete Global Value Chains, Clusters, and SMEs in Latin America** Carlo Pietrobelli, Roberta Rabellotti, 2010 Does enterprise participation in global markets ensure sustainable income growth? Policies have often been designed in the belief that this is true, but competitiveness and participation in international markets may take very different forms, and developing countries do not always benefit. This book presents a series of rich and original field studies from Latin America, conducted by the authors with the same consistent methodological approach, and represents a theory-generating exercise within clusters and economic development literature. The main question addressed is how Latin American small and medium-sized enterprises (SMEs) may participate in global markets in ways that provide for sustainable income growth, the "high road" to competitiveness. In contrast, the "low road" is often typically followed by small firms from developing countries, which often compete by squeezing wages and revenues rather than by increasing productivity, salaries, and profits.

**ann timmer political affiliation:** **Transitional Justice and Development** Pablo De Greiff, Roger Duthie, 2009 As developing societies emerge from legacies of conflict and authoritarianism, they are frequently beset by poverty, inequality, weak institutions, broken infrastructure, poor governance, insecurity, and low levels of social capital. These countries also tend to propagate massive human rights violations, which displace victims who are marginalized, handicapped, widowed, and orphaned--in other words, people with strong claims to justice. Those who work with others to address development and justice often fail to supply a coherent response to these concerns. The essays in this volume confront the intricacies--and interconnectedness--of transitional governance issues head on, mapping the relationship between two fields that, academically and in practice, have grown largely in isolation of one another. The result of a research project conducted by the International Center for Transitional Justice (ICTJ), this book explains how justice and recovery can be aligned not only in theory but also in practice, among both people and governments as they reform.

**ann timmer political affiliation:** **Stereotypes and Human Rights Law** Eva Brems, Alexandra Timmer, 2016 Stereotypes are beliefs about groups of people. Some examples, taken from human rights case law, are the notions that 'Roma are thieves', 'women are responsible for childcare', and 'people with a mental disability are incapable of forming political opinions'. Increasingly, human rights monitoring bodies including the European and inter-American human

rights courts, the Committee on the Elimination of Discrimination against Women, and the Committee on the Elimination of Racial Discrimination voice concerns about stereotyping and warn States not to enforce harmful stereotypes. Human rights bodies thus appear to be starting to realise what social psychologists discovered a long time ago: that stereotypes underlie inequality and discrimination. Despite their relevance and their legal momentum, however, stereotypes have so far received little attention from human rights law scholars. This volume is the first one to broadly analyse stereotypes as a human rights issue. The scope of the book includes different stereotyping grounds such as race, gender, and disability. Moreover, this book examines stereotyping approaches across a broad range of supranational human rights monitoring bodies, including the United Nations human rights treaty system as well as the regional systems that are most developed when it comes to addressing stereotypes: the Council of Europe and the inter-American system.

**ann timmer political affiliation:** The 1.5 Billion People Question Harold Alderman, Ugo Gentilini, Ruslan Yemtsov, 2017 This book addresses the thorny and fascinating question of how food and voucher programs, despite theory and evidence generally favoring cash, remain relevant, have evolved, and, in most circumstances, have improved over time. In doing so, we take an evolutionary and pragmatic view; we are interested in understanding why food-based programs exist and how countries can benefit from transformations such as that of Chhattisgarh, not in determining whether those programs should exist.
