Tech expert Jeff Carlson helps you understand the watch mindset, pick the watch model that's right for you, set up and share its faces and their complications, get the notifications you want, take advantage of the health and fitness features, handle communications, and learn how the controls and core apps work. The Apple Watch has become the world's best-selling watch, as well as the most popular wearable digital device. Since the device's introduction in 2015, Apple has developed numerous new watch product lines, vastly expanded the device's capabilities, and enabled developers to create entirely new apps and tools. The Apple Watch hides an enormous amount of technical complexity behind that unassuming touch screen, and with help from author Jeff Carlson, you'll unlock every last bit of its power. With watchOS 10, Apple dramatically changed some of the core watch interactions, which Jeff covers here. Take Control of Apple Watch covers all Apple Watch models through Series 9 and Apple Watch Ultra 2, as well as all the new features introduced in watchOS 10. Jeff walks you through getting to know the Apple Watch (including how to pick one out if you haven't already), along with topics that teach you how to navigate among the watch's screens with the physical controls, taps on the screen, and Siri. You'll also find advice on customizing watch faces and sharing them with others; taking advantage of the electrocardiogram (ECG) capability and blood oxygen sensor, plus the temperature sensors introduced in the Series 8 and Ultra; getting the notifications you want; handling text and voice communications; using Apple's core apps; and monitoring your heart rate, hearing, and monthly cycle to improve your overall health. A final chapter discusses taking care of your Apple Watch, including recharging, restarting, resetting, and restoring. Among the many topics covered in the book are: • Picking out and setting up your own Apple Watch—covers models up through Series 9 and Apple Watch Ultra 2 • How to adapt to the numerous changed gestures in watchOS 10 • Making watch face complications work for you • Using Control Center and Smart Stack • Understanding how the watch interacts with your iPhone (including how to control your watch with your iPhone) • Staying connected using a cellular-enabled Apple Watch model • Using Siri on your watch for a wide variety of tasks • Tracking your exercise, even when you leave your iPhone at home • Using your watch to monitor sleep data • Placing and receiving phone calls on the watch • Getting navigation directions (and using the redesigned Compass app, including waypoints and the Backtrack feature introduced in watchOS 9) • Using the

apple watch ultra guide: *Drive* Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.
