april 9 in history: *The Appomattox Campaign* Chris Calkins, 1997-07-21 Previous accounts of the Civil War's last major campaign have often neglected the actual maneuvers and tactics of the units involved. This new addition to the Great Campaigns series features a tactical approach to the final drama of the Civil War. Innovative maps, sidebars and charts complement a dramatic narrative. The fall of Petersburg and Richmond, the last battles at Five Forks, Sailor's Creek, and Dinwiddie Court House, and the final surrender at Appomattox are all described by an author whose knowledge of the historical sources is equaled by his familiarity with the area over which the armies marched and fought. The author provides a day-to-day narrative of this fascinating campaign, with a series of specially commissioned maps that make clear the complex series of maneuvers that finally brought Lee's beleaguered army to bay. Special sidebars highlight many incidents and personalities of the campaign, including never-before-published information on African-Americans in Confederate service. Record-keeping, especially for the Confederates, was difficult in the last hectic days of the war, and readers will find here the most complete order of battle available for both sides.

april 9 in history: *Civil War Day by Day* E.B. Long, 2012-06-06 "In all the vast collection of books on the American Civil War there is no book like this one," says Bruce Catton. Never before has such a stunning body of facts dealing with the war been gathered together in one place and presented in a coherent, useful, day-by-day narrative. And never before have statistics revealed human suffering of such heroic and tragic magnitude. The text begins in November, 1860, and ends with the conclusion of hostilities in May, 1865, and the start of reconstruction. It is designed to furnish the reader not only with information, but to tell a story. Here, in addition to the momentous events that are a familiar part of our history, the daily entries recount innumerable lesser military actions as well as some of the other activities and thoughts of men great and unknown engaged in America's most costly war: · May 5, 1864—a private in the Army of Northern Virginia writes at the beginning of the Battle of the Wilderness, "It is a beautiful spring day on which all this bloody work is being done." · May 6, 1864—Gen. Lee rides among his men and is shouted to the rear by his protective troops. · April 30, 1864—Joe David, five-year-old son of the Confederate President, dies after a fall from the high veranda of the White House in Richmond. · April 14, 1865—President Lincoln's busy day includes a Cabinet meeting where he tells of his recurring dream of a ship moving with great rapidity toward a dark and indefinite shore; that night Mr. Lincoln attends a performance of a trifling comedy at Ford's Theatre, "Our American Cousin".

Caught in a web of lies between two families both looking for an explanation, Lyman's reasons for his deceitfulness shed new light on old memories and replace deception with the unavoidable, aching truth.--Back cover.

april 9 in history: The Assassination of Gaitán Herbert Braun, 2003-10-15 Drawn in part from personal interviews with participants and witnesses, Herbert Braun’s analysis of the riot’s roots, its patterns and consequences, provides a dramatic account of this historic turning point and an illuminating look at the making of modern Colombia. Braun’s narrative begins in the year 1930 in Bogotá, Colombia, when a generation of Liberals and Conservatives came to power convinced they could keep the peace by being distant, dispassionate, and rational. One of these politicians, Jorge Eliécer Gaitán, was different. Seeking to bring about a society of merit, mass participation, and individualism, he exposed the private interests of the reigning politicians and engendered a passionate relationship with his followers. His assassination called forth urban crowds that sought to destroy every visible evidence of public authority of a society they felt no longer had the moral right to exist. This is a book about behavior in public: how the actors—the political elite, Gaitán, and the crowds—explained and conducted themselves in public, what they said and felt, and what they sought to preserve or destroy, is the evidence on which Braun draws to explain the conflicts contained in Colombian history. The author demonstrates that the political culture that was emerging through these tensions offered the hope of a peaceful transition to a more open, participatory, and democratic society. “Most Colombians regard Jorge Eliécer Gaitán as a pivotal figure in their nation’s history, whose assassination on April 9, 1948 irrevocably changed the course of events in the twentieth century. . . . As biography, social history, and political analysis, Braun’s book is a tour de force.”—Jane M. Rausch, *Hispanic American Historical Review*

april 9 in history: The American Museum of Natural History and How It Got That Way Colin Davey, 2019-05-14 Tells the story of the building of the American Museum of Natural History and Hayden Planetarium, a story of history, politics, science, and exploration, including the roles of American presidents, New York power brokers, museum presidents, planetarium directors, polar and African explorers, and German rocket scientists. The American Museum of Natural History is one of New York City’s most beloved institutions, and one of the largest, most celebrated museums in the world. Since 1869, generations of New Yorkers and tourists of all ages have been educated and entertained here. Located across from Central Park, the sprawling structure, spanning four city blocks, is a fascinating conglomeration of many buildings of diverse architectural styles built over a period of 150 years. The first book to tell the history of the museum from the point of view of these buildings, including the planned Gilder Center, *The American Museum of Natural History and How It Got That Way* contextualizes them within New York and American history and the history of

science. Part II, "The Heavens in the Attic," is the first detailed history of the Hayden Planetarium, from the museum's earliest astronomy exhibits, to Clyde Fisher and the original planetarium, to Neil deGrasse Tyson and the Rose Center for Earth and Space, and it features a photographic tour through the original Hayden Planetarium. Author Colin Davey spent much of his childhood literally and figuratively lost in the museum's labyrinthine hallways. The museum grew in fits and starts according to the vicissitudes of backroom deals, personal agendas, two world wars, the Great Depression, and the Cold War. Chronicling its evolution—from the selection of a desolate, rocky, hilly, swampy site, known as Manhattan Square to the present day—the book includes some of the most important and colorful characters in the city's history, including the notoriously corrupt and powerful "Boss" Tweed, "Father of New York City" Andrew Haswell Green, and twentieth-century powerbroker and master builder Robert Moses; museum presidents Morris K. Jesup, Henry Fairfield Osborn, and Ellen Futter; and American presidents, polar and African explorers, dinosaur hunters, and German rocket scientists. Richly illustrated with period photos, *The American Museum of Natural History and How It Got That Way* is based on deep archival research and interviews.

april 9 in history: **April 1865** Jay Winik, 2010-11-16 One month in 1865 witnessed the frenzied fall of Richmond, a daring last-ditch Southern plan for guerrilla warfare, Lee's harrowing retreat, and then, Appomattox. It saw Lincoln's assassination just five days later and a near-successful plot to decapitate the Union government, followed by chaos and coup fears in the North, collapsed negotiations and continued bloodshed in the South, and finally, the start of national reconciliation. In the end, April 1865 emerged as not just the tale of the war's denouement, but the story of the making of our nation. Jay Winik offers a brilliant new look at the Civil War's final days that will forever change the way we see the war's end and the nation's new beginning. Uniquely set within the larger sweep of history and filled with rich profiles of outsize figures, fresh iconoclastic scholarship, and a gripping narrative, this is a masterful account of the thirty most pivotal days in the life of the United States.

april 9 in history: **The Federalist Papers** Alexander Hamilton, John Jay, James Madison, 2018-08-20 Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States

Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

april 9 in history: **The Hour of Fate** Susan Berfield, 2020-05-05 A riveting narrative of Wall Street buccaneering, political intrigue, and two of American history's most colossal characters, struggling for mastery in an era of social upheaval and rampant inequality. It seemed like no force in the world could slow J. P. Morgan's drive to power. In the summer of 1901, the financier was assembling his next mega-deal: Northern Securities, an enterprise that would affirm his dominance in America's most important industry-the railroads. Then, a bullet from an anarchist's gun put an end to the business-friendly presidency of William McKinley. A new chief executive bounded into office: Theodore Roosevelt. He was convinced that as big business got bigger, the government had to check the influence of the wealthiest or the country would inch ever closer to collapse. By March 1902, battle lines were drawn: the government sued Northern Securities for antitrust violations. But as the case ramped up, the coal miners' union went on strike and the anthracite pits that fueled Morgan's trains and heated the homes of Roosevelt's citizens went silent. With millions of dollars on the line, winter bearing down, and revolution in the air, it was a crisis that neither man alone could solve. Richly detailed and propulsively told, *The Hour of Fate* is the gripping story of a banker and a president thrown together in the crucible of national emergency even as they fought in court. The outcome of the strike and the case would change the course of our history. Today, as the country again asks whether saving democracy means taming capital, the lessons of Roosevelt and Morgan's time are more urgent than ever.
