associate's degree general education transfer program: Teaching Global Citizenship Lloyd Kornelsen, Geraldine Balzer, Karen M. Magro, 2020-12-18 Teaching Global Citizenship brings together perspectives from former and current teachers from across Canada to tackle the unique challenges surrounding educating for global awareness. The contributors discuss strategies for encouraging young people to cultivate a sense of agency and global responsibility. Reflecting on the educator's experience, each chapter engages with critical questions surrounding teaching global citizenship, such as how to help students understand and navigate the tension at the heart of global citizenship between universalism and pluralism, and how to do so without frightening, regressing, mythicizing, imposing, or colonizing. Based on narrative inquiry, the contributors convey their insights through stories from their classroom experiences, which take place in diverse educational settings: from New Brunswick to British Columbia to Nunavut, in rural and urban areas, and in public and private schools. Covering a broad range of topics surrounding the complexity of educating for global citizenship, this timely text will benefit those in education, global citizenship, curriculum development, and social studies courses across Canada. FEATURES: - Grounded in narrative inquiry, experiential learning, and teacher-based research - Includes study questions at the end of each chapter - Written by teachers for teachers with the accessibility of the material, diverse voices, and a broad spectrum of classroom settings in mind

associate's degree general education transfer program: The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Integrating Higher Education in the Arts, Humanities, Sciences, Engineering, and Medicine, 2018-06-21 In the United States, broad study in an array of different disciplines –arts, humanities, science, mathematics, engineering– as well as an in-depth study within a special area of interest, have been defining characteristics of a higher education. But over time, in-depth study in a major discipline has come to dominate the curricula at many institutions. This evolution of the curriculum has been driven, in part, by increasing specialization in the academic disciplines. There is little doubt that disciplinary specialization has helped produce many of the achievement of the past century. Researchers in all academic disciplines have been able to delve more deeply into their areas of expertise, grappling with ever more specialized and fundamental problems. Yet today, many leaders, scholars, parents, and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos. These silos represent what many see as an artificial separation of academic disciplines. This study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time. The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science, technology, engineering, mathematics, and medicine (STEMM) lead to improved educational and career outcomes for undergraduate and graduate students. It explores evidence regarding the value of integrating more STEMM curricula and labs into the academic programs of students majoring in the humanities and

arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEMM education programs.

associate's degree general education transfer program: (Re)Defining the Goal Kevin J. Fleming, Ph.d., Ph D Kevin J Fleming, 2016-07-02 How is it possible that both university graduates and unfilled job openings are both at record-breaking highs? Our world has changed. New and emerging occupations in every industry now require a combination of academic knowledge and technical ability. With rising education costs, mounting student debt, fierce competition for jobs, and the oversaturation of some academic majors in the workforce, we need to once again guide students towards personality-aligned careers and not just into college. Extensively researched, (Re)Defining the Goal deconstructs the prevalent one-size-fits-all education agenda. The author provides a fresh perspective, replicable strategies, and outlines six proven steps to help students secure a competitive advantage in the new economy. Gain a new paradigm and the right resources to help students avoid the pitfalls of unemployment, or underemployment, after graduation.

associate's degree general education transfer program: Perspectives on Childhood Aisling Leavy, Margaret Nohilly, 2021-07-27 This collection brings together various cutting-edge and accessible perspectives and insights into the rich, complex and intriguing stage of life that is childhood. Contributions here relate specifically to the Irish context, with many seamless connections also made to the universal themes of childhood and their relevance within the international context. The chapters are organised into four themes: (1) Children and families in education and special education settings; (2) Children's environment and play spaces; (3) Children's voice in research, classrooms and non-traditional settings; and (4) Children's experiences in STEM education. Across the chapters, the authors identify current best practices and place them within the overall context of current trends in research into childhood. There is a complementary balance of theoretical and practical knowledge presented throughout the volume. Given the variety of perspectives and contributions presented here, it will be of interest to those working in professional practice, such as educators, psychologists, sociologists, and the more general public, including parents and policymakers.

associate's degree general education transfer program: How Liberal Arts and Sciences Majors Fare in Employment Debra Humphreys, Patrick Kelly, 2014-01-22 Student, parents, and policy makers interested in the return on investment of college education tend to place unwarranted emphasis on the choice of undergraduate major, often assuming that a major in a liberal arts field has a negative effect on employment prospects and earnings potential. This new report--which includes data on earnings, employment rates, graduate school earnings bumps, and commonly chosen professions--presents clear evidence to the contrary. It shows not only that the college degree remains a sound investment, especially in these difficult economic times, but also that --as compared to students who major in professional, preprofessional, or STEM fields--liberal arts majors fare very well in terms of both earnings and long-term success.

associate's degree general education transfer program: Implementing Transfer Associate Degrees: Perspectives From the States Carrie B. Kisker, Richard L. Wagoner, 2013-02-25 In recent years, a convergence of several forces—increased legislative involvement in higher education, governmental and philanthropic pressure to increase postsecondary degree and certificate production, and fiscal belt-tightening at colleges and universities across America—has resulted in efforts to significantly reform community college-to-university transfer and articulation

processes. One increasingly popular method of reform is the implementation of transfer associate degrees: statewide pathways or degree programs that allow students to both earn an associate degree from a community college and transfer seamlessly into a state university with junior status. This volume of *New Directions for Community Colleges* outlines the elements of effective transfer associate degrees and explores their implementation in six states. This is the 160th volume of this Jossey-Bass quarterly report series. Essential to the professional libraries of presidents, vice presidents, deans, and other leaders in today's open-door institutions, *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

associate's degree general education transfer program: *You Can Do Anything* George Anders, 2017-08-08 In a tech-dominated world, the most needed degrees are the most surprising: the liberal arts. Did you take the right classes in college? Will your major help you get the right job offers? For more than a decade, the national spotlight has focused on science and engineering as the only reliable choice for finding a successful post-grad career. Our destinies have been reduced to a caricature: learn to write computer code or end up behind a counter, pouring coffee. Quietly, though, a different path to success has been taking shape. In *You Can Do Anything*, George Anders explains the remarkable power of a liberal arts education - and the ways it can open the door to thousands of cutting-edge jobs every week. The key insight: curiosity, creativity, and empathy aren't unruly traits that must be reined in. You can be yourself, as an English major, and thrive in sales. You can segue from anthropology into the booming new field of user research; from classics into management consulting, and from philosophy into high-stakes investing. At any stage of your career, you can bring a humanist's grace to our rapidly evolving high-tech future. And if you know how to attack the job market, your opportunities will be vast. In this book, you will learn why resume-writing is fading in importance and why telling your story is taking its place. You will learn how to create jobs that don't exist yet, and to translate your campus achievements into a new style of expression that will make employers' eyes light up. You will discover why people who start in eccentric first jobs - and then make their own luck - so often race ahead of peers whose post-college hunt focuses only on security and starting pay. You will be ready for anything.

associate's degree general education transfer program: Mathematics Learning in Early Childhood National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Early Childhood Mathematics, 2009-11-13 Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized,

especially those children who are economically disadvantaged. This is due, in part, to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners—those who work directly with children and their families in shaping the policies that affect the education of young children.

associate's degree general education transfer program: Fifty State Systems of Community Colleges Terrence Alfred Tollefson, Rick L. Garrett, William G. Ingram, 1999 A significant contribution to the literature about American community colleges, this guide describes the community college system in each state in terms of its purpose, history, and the current status of its governance, funding, and enrollment. Forty-eight contributors, who are professional community college leaders, have written about the schools in their respective states. The coeditors all have substantial high-level administrative experience in individual community colleges or state community college systems. This publication provides valuable insights regarding how community colleges began in each state, their amazing growth in the 20th century, and the challenges they face as they enter the next millennium.

associate's degree general education transfer program: Early Childhood Studies Rod Parker-Rees, Caroline Leeson, 2015-07-13 For students of Early Childhood Studies, questions are as important as answers. What is childhood? Is childhood the same in all cultures? How do children grow and develop? What space do we make for children in our society? How do adults approach risk and what does this mean for children? Can children's play be planned by adults? Early Childhood Studies tackles these questions and more. It explores the why, how and what of studying and working with young children and their families, considering how a range of theories can help us to identify useful questions. This is a comprehensive, up-to-date, challenging and accessible core text for the Early Childhood Studies course. Throughout, key theories and research findings are highlighted and explored to help link theory and practice. It covers the important themes of child development, communication, wellbeing, observation, working with parents, inclusive practice, leadership and research. This fourth edition has been fully updated throughout and includes new chapters on children and risk, inclusive learning environments, play and adults' concepts of childhood.

associate's degree general education transfer program: *Alternative Pathways to the Baccalaureate* Nancy Remington, Ronald Remington, 2023-07-03 "This book does an excellent job of tracing the history of the movement and where it stands today. It discusses the political context when these discussions happen in states and the education implications when institutions take on this additional mission. This book may or may not convert those who are concerned about 'mission creep' of community colleges, but it sure will give them something to think about. Clearly we cannot continue to do business as we have always done and expect to meet the growing demand for college educated citizens. This book provides some thoughts on how to create a new model going forward and it deserves serious consideration."—from the Foreword by Carol D'Amico The premise of this book is that, in a globalized economy dependent on innovation and knowledge, higher education must provide greater, more affordable access to the acquisition of higher-level skills and knowledge for a greater proportion of the population. The purpose of this book is to open up a debate about the status quo. Should four-year institutions remain the near-exclusive conferrers of the baccalaureate? Or is there a legitimate role for community colleges who already educate over half the undergraduate population of the United States, at lower cost with few barriers to access? The contributors examine the capacities of four-year colleges to deliver training for technical occupations; the ability of community colleges to deliver rigorous, high-quality courses; and issues of access, affordability, faculty development, and responsiveness to changing needs. A chapter devoted to student voices provides the critical perspective of this constituency. The book concludes by describing examples of implementation across the United States, reviewing different models of articulation as well as promising practices that include eliminating the need for transfer altogether. *Alternative Pathways to the Baccalaureate* provides vital information and new research for policymakers, community college leaders, and scholars of higher education to provoke much-needed debate. Published in association with the Community College Baccalaureate Association
