baker institute anger management: Restraining Rage William V. Harris, 2009-07 The angry emotions, and the problems they presented, were an ancient Greek preoccupation from Homer to late antiquity. From the first lines of the Iliad to the church fathers of the fourth century A.D., the control or elimination of rage was an obsessive concern. From the Greek world it passed to the Romans. Drawing on a wide range of ancient texts, and on recent work in anthropology and psychology, *Restraining Rage* explains the rise and persistence of this concern. W. V. Harris shows that the discourse of anger-control was of crucial importance in several different spheres, in politics--both republican and monarchical--in the family, and in the slave economy. He suggests that it played a special role in maintaining male domination over women. He explores the working out of these themes in Attic tragedy, in the great Greek historians, in Aristotle and the Hellenistic philosophers, and in many other kinds of texts. From the time of Plato onward, educated Greeks developed a strong conscious interest in their own psychic health. Emotional control was part of this. Harris offers a new theory to explain this interest, and a history of the anger-therapy that derived from it. He ends by suggesting some contemporary lessons that can be drawn from the Greek and Roman experience.

baker institute anger management: Ugly Feelings Sianne Ngai, 2009-07-01 Envy, irritation,

paranoia—in contrast to powerful and dynamic negative emotions like anger, these non-cathartic states of feeling are associated with situations in which action is blocked or suspended. In her examination of the cultural forms to which these affects give rise, Sianne Ngai suggests that these minor and more politically ambiguous feelings become all the more suited for diagnosing the character of late modernity. Along with her inquiry into the aesthetics of unprestigious negative affects such as irritation, envy, and disgust, Ngai examines a racialized affect called “animatedness,” and a paradoxical synthesis of shock and boredom called “stuplimity.” She explores the politically equivocal work of these affective concepts in the cultural contexts where they seem most at stake, from academic feminist debates to the Harlem Renaissance, from late-twentieth-century American poetry to Hollywood film and network television. Through readings of Herman Melville, Nella Larsen, Sigmund Freud, Alfred Hitchcock, Gertrude Stein, Ralph Ellison, John Yau, and Bruce Andrews, among others, Ngai shows how art turns to ugly feelings as a site for interrogating its own suspended agency in the affirmative culture of a market society, where art is tolerated as essentially unthreatening. Ngai mobilizes the aesthetics of ugly feelings to investigate not only ideological and representational dilemmas in literature—with a particular focus on those inflected by gender and race—but also blind spots in contemporary literary and cultural criticism. Her work maps a major intersection of literary studies, media and cultural studies, feminist studies, and aesthetic theory.

baker institute anger management: Raising Their Voices Lyn Mikel Brown, 1999 This book, filled with the voices of teenage girls, corrects the misperceptions that have crept into our picture of female adolescence. Based on the author's yearlong conversation with white junior high and middle school girls -- from the working poor and the middle class -- *Raising Their Voices* allows us to hear how girls adopt some expectations about gender but strenuously resist others, how they use traditionally feminine means to maintain their independence, and how they recognize and resist pressures to ignore their own needs and wishes.

baker institute anger management: Parenting Matters National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

baker institute anger management: Transforming the Workforce for Children Birth

Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

baker institute anger management: Preventing Bullying Through Science, Policy, and Practice National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Board on Children, Youth, and Families, Committee on the Biological and Psychosocial Effects of Peer Victimization: Lessons for Bullying Prevention, 2016-09-14 Bullying has long been tolerated as a rite of passage among children and adolescents. There is an implication that individuals who are bullied must have asked for this type of treatment, or deserved it. Sometimes, even the child who is bullied begins to internalize this idea. For many years, there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate. But bullying is not developmentally appropriate; it should not be considered a normal part of the typical social grouping that occurs throughout a child's life. Although bullying behavior endures through generations, the milieu is changing. Historically, bullying has occurred at school, the physical setting in which most of childhood is centered and the primary source for peer group formation. In recent years, however, the physical setting is not the only place bullying is occurring. Technology allows for an entirely new type of digital electronic aggression, cyberbullying, which takes place through chat rooms, instant messaging, social media, and other forms of digital electronic communication. Composition of peer groups, shifting demographics, changing societal norms, and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States. Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization. Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents, educators and school administrators, health care providers, policy makers, families, and others concerned with the care of children, this report evaluates the state of the science on biological and psychosocial consequences

of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences.

baker institute anger management: *Communities in Action* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

baker institute anger management: *Sexual Harassment of Working Women* Catharine A. MacKinnon, Professor Catharine A MacKinnon, 1979-01-01 A comprehensive legal theory is needed to prevent the persistence of sexual harassment. Although requiring sexual favors as a quid pro quo for job retention or advancement clearly is unjust, the task of translating that obvious statement into legal theory is difficult. To do so, one must define sexual harassment and decide what the law's role in addressing harassment claims should be. In *Sexual Harassment of Working Women*, Catharine MacKinnon attempts all of this and more. In making a strong case that sexual harassment is sex discrimination and that a legal remedy should be available for it, the book proposes a new standard for evaluating all practices claimed to be discriminatory on the basis of sex. Although MacKinnon's inequality theory is flawed and its implications are not considered sufficiently, her formulation of it makes the book a significant contribution to the literature of sex discrimination. MacKinnon calls upon the law to eliminate not only sex discrimination but also most instances of sexism from society. She uses traditional theories in an admittedly strident manner, and relies upon both traditional and radical-feminist sources. The results of her effort are mixed. The book is at times fresh and challenging, at times needlessly provocative. -- <https://www.jstor.org> (Sep. 30, 2016).

baker institute anger management: *Beyond Anger and Violence* Stephanie S. Covington, 2014-05-27 The participant's essential guide to reflection and personal growth *Beyond Anger and Violence: A Program for Women Participant Workbook* is the participant's personal place for reflection, reactions, and learning, during and after management sessions. The activities inside reinforce program lessons about anger and violence, including how families, relationships, communities, and society affect one's life. In learning about the relationships between thoughts, feelings, and behaviors, participants can begin to grasp a better self-understanding that will help them manage anger in a healthier, more productive manner. They'll develop new skills for communication, conflict resolution, and decision-making, and will be introduced to a variety of calming techniques. *Beyond Anger and Violence* is a 40-hour, evidence-based program designed for women who have difficulty managing anger. Based on a social-ecological model, the program addresses the factors that put people at risk for experiencing overwhelming feelings of anger, and perpetrating assaults or destruction of property. This curriculum acknowledges anger as a normal, appropriate, and human emotion, but also recognizes the destruction it can lead to if allowed to get out of control. This workbook will help guide participants through the program, reinforcing the discussions held in session. Topics include: The effects of trauma Relationships and communication, control, and conflict The importance of safety and the power of community Self-transformation, and

creating change The workbook also includes a Daily Anger Log, a Self-Reflection Tool, and list of yoga poses that can have a calming effect on both body and mind. Participants may already recognize the effects of anger on their lives, and that it may even be affecting their health. Through the Beyond Anger and Violence program, and the exercises in this workbook, they can join a group of women working to create a less-violent world.

baker institute anger management: Bored, Lonely, Angry, Stupid Luke Fernandez, Susan J. Matt, 2020-07-07 An Entrepreneur Best Book of the Year Facebook makes us lonely. Selfies breed narcissism. On Twitter, hostility reigns. Pundits and psychologists warn that digital technologies substantially alter our emotional states, but in this lively investigation of changing feelings about technology, we learn that the gadgets we use don’t just affect how we feel—they can profoundly change our sense of self. When we say we’re bored, we don’t mean the same thing as a Victorian dandy. Could it be that political punditry has helped shape a new kind of anger? Luke Fernandez and Susan Matt take us back in time to consider how our feelings of loneliness, boredom, vanity, and anger have evolved in tandem with new technologies. “Technologies have been shaping [our] emotional culture for more than a century, argue computer scientist Luke Fernandez and historian Susan Matt in this original study. Marshalling archival sources and interviews, they trace how norms (say, around loneliness) have shifted with technological change.” —*Nature* “A powerful story of how new forms of technology are continually integrated into the human experience.” —*Publishers Weekly*

baker institute anger management: *Families Caring for an Aging America* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Family Caregiving for Older Adults, 2016-12-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

baker institute anger management: *Epilepsy Across the Spectrum* Institute of Medicine, Board on Health Sciences Policy, Committee on the Public Health Dimensions of the Epilepsies, 2012-07-29 Although epilepsy is one of the nation's most common neurological disorders, public understanding of it is limited. Many people do not know the causes of epilepsy or what they should do if they see someone having a seizure. Epilepsy is a complex spectrum of disorders that affects an estimated 2.2 million Americans in a variety of ways, and is characterized by unpredictable seizures that differ in type, cause, and severity. Yet living with epilepsy is about much more than just seizures; the disorder is often defined in practical terms, such as challenges in school, uncertainties about social situations and employment, limitations on driving, and questions about independent living. The Institute of Medicine was asked to examine the public health dimensions of the epilepsies, focusing on public health surveillance and data collection; population and public health research; health policy, health care, and human services; and education for people with the disorder and their families, health care providers, and the public. In *Epilepsy Across the Spectrum*, the IOM makes recommendations ranging from the expansion of collaborative epilepsy surveillance efforts, to the coordination of public awareness efforts, to the engagement of people with epilepsy and their families in education, dissemination, and advocacy for improved care and services. Taking action across multiple dimensions will improve the lives of people with epilepsy and their families. The realistic, feasible, and action-oriented recommendations in this report can help enable short- and long-term improvements for people with epilepsy. For all epilepsy organizations and advocates, local, state, and federal agencies, researchers, health care professionals, people with epilepsy, as well as the public, *Epilepsy Across the Spectrum* is an essential resource.

The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of

interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to examine the causes, domestic and global, of the current financial and economic crisis in the United States. It was established as part of the Fraud Enforcement and Recovery Act of 2009. baker institute anger management: The Changing of the Guard Simon Akam, 2021-02-11 A TLS and a Prospect Book of the Year A revelatory, explosive new analysis of the British military today. Over the first two decades of the twenty-first century, Britain has changed enormously. During this time, the British Army fought two campaigns, in Iraq and Afghanistan, at considerable financial and human cost. Yet neither war achieved its objectives. This book questions why, and provides challenging but necessary answers. Composed from assiduous documentary research, field reportage, and hundreds of interviews with many soldiers and officers who served, as well as the politicians who directed them, the allies who accompanied them, and the family members who loved and — on occasion — lost them, it is a strikingly rich, nuanced portrait of one of our pivotal national institutions in a time of great stress. Award-winning journalist Simon Akam, who spent a year in the army when he was 18, returned a decade later to see how the institution had changed. His book examines the relevance of the armed forces today — their social, economic, political, and cultural role. This is as much a book about Britain, and about the politics of failure, as it is about the military.

baker institute anger management: TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019) U.S. Department of Health and Human Services, 2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

baker institute anger management: **Cancer Care for the Whole Patient** Institute of Medicine, Board on Health Care Services, Committee on Psychosocial Services to Cancer Patients/Families in a Community Setting, 2008-03-19 Cancer care today often provides state-of-the-science biomedical treatment, but fails to address the psychological and social (psychosocial) problems associated with the illness. This failure can compromise the effectiveness of health care and thereby adversely affect the health of cancer patients. Psychological and social problems created or exacerbated by cancer-including depression and other emotional problems; lack of information or skills needed to manage the illness; lack of transportation or other resources; and disruptions in work, school, and family life-cause additional suffering, weaken adherence to prescribed treatments, and threaten patients' return to health. Today, it is not possible to deliver high-quality cancer care without using existing approaches, tools, and resources to address patients' psychosocial health needs. All patients with cancer and their families should expect and receive

cancer care that ensures the provision of appropriate psychosocial health services. Cancer Care for the Whole Patient recommends actions that oncology providers, health policy makers, educators, health insurers, health planners, researchers and research sponsors, and consumer advocates should undertake to ensure that this standard is met.

It reflects their chances to travel, listen and deepen their commitment to and claim upon partiality. All Incomplete studies the history of a preference for the force and ground and underground of social existence. Engaging a vibrant constellation of thought that includes the work of Amílcar Cabral, Erica Edwards, Denise Ferreira da Silva, Cedric Robinson, Walter Rodney, Hortense Spillers and many others, Harney and Moten seek to share and understand that preference. In so doing, Moten and Harney hope to have forged what Manolo Callahan, echoing Ivan Illich, calls a convivial tool that - despite the temptation to improve and demand, develop and govern, separate and grasp - helps us renew our habits of assembly. All Incomplete features the work of award winning photographer Zun Lee, exploring and celebrating the everyday spaces of Black sociality, intimacy, belonging, and insurgency, and a preface by Denise Ferreira da Silva.

baker institute anger management: Ella Baker and the Black Freedom Movement, Second Edition Barbara Ransby, 2024-10-08 One of the most important African American leaders of the twentieth century and perhaps the most influential woman in the civil rights movement, Ella Baker (1903-1986) was an activist whose remarkable career spanned fifty years and touched thousands of lives. A gifted grassroots organizer, Baker shunned the spotlight in favor of vital behind-the-scenes work that helped power the Black freedom struggle. Making her way in predominantly male circles while maintaining relationships with a vibrant group of women, students, and activists, Baker was a national officer and key figure in the NAACP, a founder of the Southern Christian Leadership Conference, and a prime mover in the creation of the Student Nonviolent Coordinating Committee. In this definitive biography, Barbara Ransby chronicles Baker's long and rich career, revealing her complexity, radical democratic worldview, and enduring influence on group-centered, grassroots activism. Beyond documenting an extraordinary life, Ransby paints a vivid picture of the African American fight for justice and its intersections with other progressive struggles worldwide throughout the twentieth century.
